Out[8]: 'the placements are below average the placement says that they offer lpa as dream job offer but that is irritating companies that visit the placement are not top ones the companies which we expect wont come to the placement many companies are local and there hostel be a language barrier while selecting worstabsolutely dissatisfiedinfrastructure is not so bad hostel life is the worst food is horrible and the worst you wont enjoy your hostel life there wont be any freshers party they wont allow you to go outside after pm it hostel be like a jail life with sitting in a room and doing somethingfaculty is bad and they motivate worst curriculum is not so bad and many subjects are not useful the exams are pretty bad the way of teaching is bad the teachers are regular in classes and they complete the syllabus neatly only some subjects are interesting about of the students from our course got placed the highest salary package offered was lpa and the average salary package offered was lpa and the lowest salary package offered was lpa top recruiting companies like wipro and mindfire solutions visit our campus for placements a top role offered to the students is a software engineer about of the students from our course got an internship in mindfire solutionsi am dissatisfied with poor placements in the year the campus consists of pg courses only the campus is not too large but it has a very peaceful environment the library is quite decent with a road number of books the library timings were just during the mess food timings labs consist of a well equipped system and the latest configuration with highspeed wifi facility the buildings of our campus were newly constructed classrooms were wellmaintained with projectors whiteboards individual desks etc the infrastructure of our department was one of the bests on the campus the hostel facility was road enough with all the facilities like sharing rooms individual beds study table chairs and cupboards a mess was not that road and being the north indian student having south indian food during the time period of the course was difficult there were not many varieties in the food and quality was also compromised there were no medical facilities and students have to go to nearby hospitals on their own in sports and games it has a few indoor games like table tennis carrom and badminton if you want to focus on your studies or can selfstudy in peace then it is a road place to opt for teachers in our mess food were really helpful and supportive they were highly qualified and they share their experience with us few teachers have great teaching quality and they keep the session very interactive they put their lot of efforts in doing that there were many curriculums related to tech fest personality development sessions etc which definitely helps the student to become industryready we are the first batch of the mechanical department no core placements offered for our friends mnc tcs company visited for the placement and students from our department got placed bpo and marketing placements took place and no one from our department attended it we went for implant training not an intern the placement cell is useless for our department they do no activities for our careerthe mess food is road who dont need enjoyment and placementthe infrastructure of the mess food was road not completed fully because it was under construction no wifi facility for the students average classrooms are provided on the campus the library is quite useful for the students only the labs were superb in our mess food with the high class interior new mechanical machines new computers etc the canteen is average and poor sometimes the hostel rooms are also average not with all kind of facilities the mechanical professors are freshers but they are helpful to their extension four professors are experienced they are more knowledgeable and gave many ideas during the project the head of the department is a pillar of mechanical since he is more experienced and quite helpful except at offering the placements the teaching quality was great and the teaching methods used are blackboard ppt and computer lab we went industrial visits to different sectors of mechanical and had road exposure the course curriculum was road and it can update more students from our batch were not placed in road organisations tcs and cts were the only recruiting companies two students got placed offcampus i got placed at a startup the highest salary package offered was lpa the lowest salary package was lpa and the medium salary package was lpa thaimart iw and sutherland and offered placements in our mess food the associate role was offered in our mess foodi dont recommend students to join this mess foodlibrary was accessible for students wifi was available but not provided for students classrooms should be improved labs were average hostel was not available canteen was average medical facilities were road sports and games were not availableall the teachers in our mess food were young and very helpful their teaching quality was average they learn new things and share them with students the course curriculum didnt train students for industry and placements semester exams are easy the pass cgpa was cgpa my post gradua

tion and my campus from our department percent of students were placed in previous years through campus placements and the average package is lacs the maximum is lacs and the minimum is lacs the top recruiting companies are federal bank hdfc bank south indian bank etc percent of students got internships in different banks like indian bank sbi and indian overseas bank the roles offered are managers our college facilities and infrastructure are sufficient for our studies like wifi connection in each class and also labs with ethernet connection classrooms are equipped with hightech facilities including whiteboards we have a general library and reading room up to am looking at the hostel facilities the rooms are very good but the mess food is not good we have more than canteens a medical center and all facilities for sports and games our teachers are well qualified and they are very helpful for our studies they contribute their maximum knowledge to support us our course is in one of the growing sectors exams are conducted within time and in a very acceptable way we have a percent pass rate best college for placement the placement cell of my college is very dedicated almost of the students get placed in good companies with good salaries various prestigious companies like infosys tcs hcl amazon etc visit my college during placement drive they offer lucrative packages and job positions the average salary package offered to us was lacs per annum and the highest salary package offered was around lacs per annum i got a package of lacs per annum at infosys the hostels are very big as well as attractive the best thing is that the hostels are within the college campus only so you do not have to take tension about going to classes mess food is also very good and hygienic they provide mess food times a day both veg and non veg meals are available there are also so many clubs and societies present in our college which you can also join my two year mba programmes curriculum covered all the important management topics like finance human resource management information systems marketing and others my department faculty was very good and are excellent in their respective fields with the holding of phd degrees the teachers were knowledgeable and experienced they told us about the real world business and management issues and how to deal with them perfectly it is a very good college in all aspects placements were very good in this college about of students were placed in this course the highest salary package offered in this course was lpa the minimum was lpa and the average was lpa there were top recruiting companies for our course around of students got internships in good companies the infrastructure of the department was well maintained free wifi was available on campus labs and classrooms were neat and clean the quality of the facilities in the hostel was good the quality of food available in the mess was excellent medical facilities were provided there was no scope for sports and games teachers were very helpful they helped us in many ways they helped with doubts related to the course and career guidance they were highly qualified and knowledgeable the teaching quality was good the course curriculum was relevant semester exams are tough so study hard to score a good percentage our college is very good our college provides good placements top recruiting companies are deloitte asian paints and cognizant the highest salary package offered is lpa the average salary package offered is lpa deloitte and other companies visit our college to recruit students during summer placements and internships many companies visit our college to recruit students hostels are spacious and attractive hostels are within the college campus so it is easy to attend classes the food served in the mess is good and hygienic they provide vegetarian and nonvegetarian meals for students a library is situated on campus a wifi facility is available for study your teachers are phd holders they are excellent in their respective fields the faculty and students ratio is around exams are conducted every semester and both exams are quite difficult to pass our college conducts semester exams we also have a case based study iim follows the gdpi process which is successful we have a study case method our college is based on practical work which makes us industry ready it is one of the best colleges for students placements were good for the final year students the top recruiting companies were tcs cognizant wipro infosys infotech and many more the average salary package offered was lpa the minimum salary package offered was lpa many eligible students got placed in our course hostels were average and the fee was also affordable the registration of the hostel was done at the time of admission it provided single rooms with all the basic facilities like air conditioner study table cupboard bed bookshelf etc the food served in the hostel was good vegetarian and nonvegetarian food items were also available but vegetarian food was the best teachers were very good they were helpful well qualified and knowledgeable their teaching method was also good the course curriculum was well designed and we can easily understand them semester exams were not difficult

ult and weekly test was also conducted in our college it is one of the best universitiesour college provides good placements students are eligible for placements if they pass their st year many companies visit our college to recruit students top recurring companies are infosys wipro tcs etc the highest salary package offered is lpa the lowest salary package offered is lpathe hostel facilities are good the hostel has good rooms around students can stay in one room the hostel has floors the hostel is under cctv surveillance the hostel has a canteen the food served in the canteen is good they provide a less variety of food itemsour teachers are good and helpful they are highly qualified they are phd holders the course curriculum is good and it makes students industryready their teaching method is good and understandable our college conducts semester exams every months semester exams are a bit difficult i am satisfied due to the faculty and good placement opportunities provided for mba studentsevery year of students from the mba course get placed in reputed companies as well as banking sectors every year of btech students will be placed in various sectors in the organisation as a reputed designation placement activities should be provided for skilful students in our organisation and even it should provide an opportunity for students with arrears to get placed in a company with a good salary package the highest salary offered is rs to per month in top mnics the banking sector provides opportunities for all the branch students in mba the college also provides internship opportunities to the students and they also get placed in the same companyfacilities provided by our college are satisfied and our college provides a peaceful environment to study and also a great platform it also provides library facilities for students for placement opportunities and also research purpose online high facility labs are available to perform well in our academics the food provided in the mess is fresh as they prepare good and healthy food daily to the students the college provides sports facilities for students to explore their career opportunities in sports quotateachers are very friendly and also wellqualified they conduct lectures for students to focus on the academic and get a top rank in the university the course curriculum is related to the industry and students learn through the study material the college is good and it has good placements in mba good infrastructure but food taste is poorthe students are placed in well established organizations seniors were placed and this year we are expecting more there is no placement here but at least students will be placed the lowest package is s lpa the highest package is lpa and the average is lpa top companies are coffee day beverages tcs itc infiniti software solutions vkc pride icici hdfc axis etc mostly management trainee sales trainee finance analyst credit manager customer relationship officer etc roles are offered i can say hardly students got the internship from the college sorry dont expect the stipend you have to work for free to get experience the pondicherry university campus has good basic facilities like campus transport and a health center sports facilities are not that much good the library has various books but most books are useless the library has to update the books the computer lab is good classrooms are equipped with airconditioners and a good infrastructure the food quality is good and the taste is not good hostel rooms are congested with three members but you can have fun here the college is good but not an excellent choice for students who can go for private collegesfaculty members are from various states of india they are helpful and few are very supportive of students a few professors have to improve the teaching and communication with students the student to faculty ratio in my department is i got exposure in industries due to my selfinterest the curriculum has to update according to current standards as of know some what okay with curriculum and getting placements with the knowledge acquired from it a start up at the time and we were really the first batch of mba students who joined the college it was really a good experience with the closely looped batch of who were the first set the coaching was good academically the teaching and lecturing has been driven by well energetic lectures and professors who was striving hard to coach the students to get good marks and results campus placements was finally not well which we might think to give low marks to the institution though the faculty tried hard to bring in some companies but the management was not showing interest to bring in companies to the institution may be we are not aware about the current situation first batch had successful academic results but did not get good placements opportunities provided to them by the institution review of pondicherry universitysince we are the second batch of the nep bsc honours physics we are unaware of placements offered it is better to do higher education in their respective courses other than going for any job going for phd is the best option there are many jobs you can get after doing msc or phdthere is wifi inside the campus

classrooms have moderate facilities the library is very vast and has a reading room the quality of the food in the mess is very poor it is the worst food ever in hostels rooms there are students we have a common bathroom teachers are very qualified and helpful they have great knowledge about the subject the teaching quality is relative to each faculty the hard internal exams and semester exams are decided by the faculty members they are taken by the respective faculty members although it is hard satisfied but not with placements in studying bsc hons in computer science and year at present so only students are taken in for our course i guess there is less scope in placements for computer science in our university because that's what my seniors said to me they would recruit only to people approximately our university has good placements in mba and tourism almost all the people i know in mba and tourism got placed so i would say those two courses have good scope apart from placements pondicherry university is a good place to meet people and interact with people from many places old hostel conditions are so bad but hostels like narmada and kannagi are far better for girls and the food facility is somewhat eatable on specific days but most of the time food isn't good it is somewhat good in the girls mess but i have heard in the boys mess the food is horrible yes teachers are good but they won't teach much we should learn everything by ourselves semester exams are difficult because we can't expect easy or direct questions from the faculty we can dive into many programming languages on our own because we will be having time for ourselves mostly you paid money for worthful college i think no one can be placed in my college because it is government college may be few members only placed minimum k to the lowest start up companies are arrived my college percentage of students only going interhip top major roles my college computer science my college don't have hostel but they have computer labs wonderful library and also have wifi system and they have lots of facilities the biggest ground and lan wifi systems and digital smart class room and conference hall and beautiful park etc in this college always teaching well because they have most experienced government staffs semester exam is not for hard and not for easy is to intermediate minimum are pass in so no fear of semesters can you read previous question paper you will definitely pass campus can do more than expected every year half of the batch or less than it gets placed the highest package offered is lpa and the average is lpa companies like tcs infosys capgemini cognizant and other startups recruit every year from my batch only of students go for internships in one billion and cts roles such as software developer sde trainee business executive hardware analyst system engineer and software tester are offered by companies classrooms are good for attending classes but there is no proper wifi connection anywhere on campus the library is maintained and accessible to all students wifi in the hostel is also not good and the food quality is average the food facility is good after the opening of the new canteen sports activities are conducted frequently on campus teachers are qualified and of great help to students and possess enough knowledge to cover the syllabus the course curriculum is relevant but it doesn't make students ready for placements and getting job offers the syllabus definitely needs an upgrade the sem exams are average and the pass percentage is 60% mess food review by a 4th year student if you consider the computer science department out of students in a year students will get placed the highest package is around lacs per annum and the lowest around lacs per annum on average lacs per annum percent of the students get internships in companies like tcs wipro etc when it comes to infrastructure it is road that you will get decent old-fashioned classroom sets with outdated syllabi even the labs aren't modern they use very old machines hostels are decent but the food is not so good there is an immediate medical team inside the campus teachers are highly qualified most of the teachers here are phd holders they are very helpful and their teaching style is also very nice when it comes to curriculum it's old-fashioned and it is exam-relevant but not industry-relevant semester exams are difficult you need 60% to pass the exam absolutely satisfied because of faculty and placement of students were placed in my course is the package offered in my course lulu group nesto etc there are more companies lulu group nesto ajfan date and united colors of benetton human resources role manager role superior officer there is 24x7 wifi available in the hostel and department also labs are available for needed courses classes are beautiful and more spacious hr opening library is there only on sunday it will be open from am to pm hostel and food is average not to say better teaching quality is excellent compared to other universities yes it makes students industry-ready for a better future it's not as difficult as other courses like btech etc the pass percentage is 60% but many of the seniors got jobs in many international companies so it's good dissatisfied because of facilities

ulty average placements and no enjoyment of students were placed in this course in our college the highest package is lpa and the average package is lpa top recruiting companies for our course are tcs hexaware zoho cts etc the roles offered include machine learning engineer ai engineer data analyst and software engineer the infrastructure is good for labs and the library but in the classroom its average they cant provide wifi for class we have to use our personal devices hostels are not too good they are moderate canteen food is also average but prices are high compared to quantity and quality faculty are also said to be normal for this course we have to learn by ourselves yes the course curriculum is relevant and makes the students industry ready semester exams are good to score a grade and the pass percentage is in theory then add the internal mark totally we have to score above or equal to 60% if dissatisfied due to the lack of better amenities in our class there are students in total internships are available in various companies depending on your performance and interests however there are no specific recruiting companies for our course after completing the course we can pursue careers in archaeology museology or research top roles offered are similar to those of any postgraduate classrooms have students but theres no better facility for students library is not road and many books we need are not available there wifi connectivity in library is poor facilities in the hostel are decent the quality of the food is very bad medical facility is also poor faculty members are well experienced in our department they are helpful and friendly and their teaching quality is good course curriculum is relevant as history is being rewritten by some people semester exams are easy pass percentage is 60% and not much difficult highly dissatisfied with the food and transportation in placements are very limited in the applied psychology department students often secure jobs on their own by taking various exams after the course most students opt for higher studies or move abroad alumni are placed in civil services and other jobs the infrastructure is very good and well maintained many courses are offered by the university however the wifi speed is not good the classrooms and library are good the hostel rooms are mainly designed for two people but they allow three persons per room the food quality is not good most of the time the food is halfcooked a health center is available inside the campus which is completely free for the students sports and games are conducted occasionally the transportation inside the campus is miserable if you dont have a vehicle the buses are limited and often crowded roads inside the campus are very poor many students have cycles on campus but are unable to go out with them during the day due to the weather the curriculum is based on new advancements in the subject the faculty members are experienced and have a good relationship with the students the teaching method is very simple so every student can understand it very well the results are good we can easily score high marks the curriculum is mainly focused on the improvement of the students semester exams are easy so everyone can pass them ready it think it and decide on your career no placements are provided by our department during our final semester there are no subjects for studying only project work for the last semester during this time we can do an internship in the food related industry or hospitals if our guide allows it in our department there will be project work based on our guides research area there are hostels available for both boys and girls all hostels have wifi connections and water connections in a room three persons will be accommodated in our department almost all classes are airconditioned and have power point connections and seating arrangements the department alone doesnt have any library but the university has a big common library that we can access during weekdays for practical work we have lab facilities though they are not that well developed all hostelers have food in the mess with chicken served twice a week eggs twice a week and vegetarian food on other days all faculty members are well qualified all holding phd degrees and having excellent publications in their research fields the teaching quality is average according to me the curriculum of these courses prepares students not only for the food industry but also for the hospital field such as nutrition dietetics etc there is no difficulty level in semester examinations if we study we can get good scores marks are calculated out of 100 and the passing marks should be above 60% it is worth the money it will give you the best memories of campus life no placements should be in our courses no campus placements only internships are provided campus placements are not in our courses they will only give us knowledge it will be helpful to get jobs outside but our course offers the best internships at great companies the facilities and infrastructure available in our course department are good with proper wifi benches classrooms and labs the quality of facilities in our hostel is average the food available in the mess and canteen is good and they are also ma

maintaining good cuisine for everyone the teachers are helpful qualified and knowledgeable the quality of teaching is good they are very intellectual the course curriculum is very relevant it will help us become industryready semester exams are difficult but if you're well prepared it will be easy to get a good score an average experience because of the hostel food and teachers in very good campus life twenty percent have been placed the average package is said to be 10 lacs per annum allen and other teaching institutes are top recruiters none of them have gotten internships as of yet the top roles offered in our course are data scientist ngs specialist and data analyst the department has wifi computer labs wet labs and ac in every classroom a small department library and an auditorium hostel food quality is average with different dishes every day the canteen has cheap good food during working hours medical facilities are good in the health center teachers are very qualified and helpful teaching quality is good for some teachers while others might be lacking the course curriculum is relevant and up to date with trends it makes students ready for the workforce semester exams are slightly tough and require thorough studying the passing percentage is pondicherry university review the percentage of students getting a placement is very low mostly mba and commerce students get placed as of our course there were no core company placements we are still working on the placement thing but surely in the coming year the scenario will be different wifi is very slow though it is in the bioinformatics department apart from the department rest other facilities are good well maintained and spacious food is mostly not good but manageable you can easily get food outside the campus gate if you want to eat something outside teachers are good but some are not very helpful the curriculum needs to be updated at least for my course and semester exams are not that tough to manage you can easily score a decent score but for gaining it you will need to work hard to keep up with the subject such as bioinformatics you can join it well worth it to join this year is the worst year for placements very few students are placed but colleges aim to achieve placement to showcase and attract new students to the college so they bring in waste companies like insurance companies or telemarketing companies to showcase the results this is a good college with good infrastructure one additional point if you join the ra department then you have a class to sit in but you have a superb lab with ac our hod will make you sit in the lab because there are sufficient classes for our new department there are good faculty who will provide you notes for your exams but some teachers are not very good at teaching the subject some teachers are even the worst they may know the subject but you are free to make fun and enjoy your college life in our department review of pondicherry engineering college pecthere were students in our batch almost of students got placed in this course the minimum salary offered was rs per month the maximum salary offered was rs per month top recruiting companies were tcs etc internships were also offered in this course all facilities were good there were laboratories in this college our campus was wifi enabled there was a decent library on campus there were classrooms in our department medical facilities were provided canteen was average sports were not conducted in this college all teachers were helpful and well qualified they always clarify our doubts the course was for years we had semesters in this course the total marks were semester exams were difficult the pass percentage was good coaching experience but the worst hostel experience there are nearly 100 of the students placed yet but most of the students are placed for the sake of showing the placed student percentage the highest package is 10 lacs per annum and the lowest package is 10 lacs per annum tcs cts hcl byjus and econ systems are the top recruiting companies data analysts and circuit designers are the top job roles offered the college facilities and infrastructure are quite good we have labs with good equipment classrooms with good ambience and a library with a wide range of books hostel food is average but the infrastructure and the stay in the hostel are the worst if you want to put your son or daughter in this college hostel please change your decision the teachers are very helpful except for one or two since they have great knowledge about the subjects and topics they are teaching about the teachers are very qualified yes it makes the students industryready the semester is pretty easy to pass its not rocket science over here the infrastructure of our college is good students who are placed in our course have a cgpa greater than the lowest salary offered is rs per month and the highest salary offered is rs per month top recruiting companies like tcs cts wipro soho etc visit our campus its about ability not the percentage they provide more internship offers this college is very strict about rules and regulations more technologies are available at our college to help students improve their skills we have three laboratory sessions a week they spl

it three periods for the laboratory and they follow strict rules in the laboratory session our teachers are very strict they follow every rule and regulation of the college they are well trained teachers who are extremely helpful in developing our skills they provide good teachers to teach well a genuine review from a student of pondicherry university i am dissatisfied with cultural events only less than of them got placed the highest package is sports and that too only for one student the lowest package is sports the average package is sports the top recruiting companies for our course are federal bank, mana tech and sbi bank an internship is mandatory in the last semester and if we try with our own connections then we can get it in good companies top roles offered are hr assistant, hr executive and business development executive the department is pretty decent with all the needed facilities wifi is available no lab facility is provided for us classrooms are well maintained with a good library is also available freedoms are affordable the food quality is not that bad but still it needs improvement medical facilities are sports, sports and games are encouraged teachers are well qualified and superb they will not help us unless they feel to help the teaching quality is good but they take revenge on the internals if we are not attending the class well the course curriculum is not relevant and it is outdated it needs further improvements exams are easy and if we prepare well we can get good marks my review on pondicherry university the campus cultural events are good but this year very less banks and companies came to select students a famous bank came into the university even banking technology students have no preference for bank jobs the highest salary package offered is sports around of students got placed in our department the course is a very dynamic one oriented to the industry requirements it is under continuous development as per the changing needs of the industry as a result we find ourselves studying in semester the very subjects that our seniors studied in second or third semester and in third semester we have different subjects as for the examination process the examination follows the cgpa the freedom fee is rs per annum with a mess fee of per day resulting in one of the cheapest accommodations available for girls the freedom fee is exempted our faculty members are excellent they go the extra mile for the students whether academics or extracurricular they prepare students like competitions they are always there to help solve any issues they take classes regularly they always inform and suggest any new course that can help gain knowledge to the students the exam structure is like a regular basis day to day it will examine your skills the internals will be conducted based on the internal marks to be allotted remaining it will be a theory based exam my best experience in college cultural events were good with some departments offering cultural events assistance major recruiting companies included ccd, axis bank, hdfc, icici, south indian bank, pick your trail and vkc many students started businesses near the campus after completing their studies cultural events were also facilitated through alumni the cultural events cell was open to all students and many of my classmates secured positions in reputed organizations like hcl and icici prudential earning attractive salaries the freedom facility was not bad and considering the cost it was reasonable there were three students per room and for international students ac rooms were sports on a first come first served basis as for the food it was not very suitable for north indian students as most items were prepared in a south indian style breakfast was very good but lunch was repetitive and boring with the same items that was informative and less academic where we learned through live case studies the exam structure followed the usual university pattern but was slightly different as it focused on the content and how students answered the questions rather than relying on memorized answers faculty members were very talented and supportive they were insightful and possessed extensive knowledge of literature from different disciplines and genres they were all highly accessible and resolved our queries without the slightest hesitation i studied a syllabus that was one of the most updated compared to any other subject it was revised every two years according to the current scenario pondicherry university mba ibour college provides cultural events offers and drives from the third semester onwards many companies and especially banks are visiting our college for cultural events activities the cultural events percentage is low compared to the previous year because students strength is high pondicherry university maintains very good infrastructure it is clean and good with a natural environment our university is completely covered with trees our classrooms have air conditioners wifi is sportson campus there is a reading room it is open till midnight at am faculty members at pondicherry university are one of the institutions with the greatest strengths they bring a wealth of knowledge and experience to the classroom with many havi

ng significant academic and industry backgrounds their dedication to student succe  
 ss is evident in their teaching it is characterised by clear communication practic  
 al insights and a genuine willingness to help students grasp complex concepts they  
 are approachable and encourage open discussions making the learning environment bo  
 th stimulating and supportive the course structure at pondicherry university is we  
 lldesigned to provide a balanced mix of theoretical knowledge and practical applic  
 ation it is structured to cover the core subjects essential for a solid foundation  
 in the field it offers electives that allow students to explore their specific are  
 as of interest there are two semesters each year and two internal exams each semes  
 ter i am dissatisfied because of the low placements and faculty members only throug  
 h campus selection the highest package was around lakhs and the average was lakhs  
 the main recruiters were from the banking industry such as federal bank and bendan  
 banks almost all students got internships in good companies like ulcc tata motors  
 and general electric the top roles offered in the course were hr managers supply c  
 hain managers product procurement officers and sales managers these are some of th  
 e roles that can be achieved by doing international business managementthe infrast  
 ructure at this college is good compared to other government colleges all classroo  
 ms have projectors and wifi and the library has a good selection of books that are  
 helpful for studies however some of the hostels lack good infrastructure due to la  
 ck of maintenance and the mess food is really bad the medical facility is not that  
 good but it is adequatesome of the professors dont have good knowledge in what the  
 y are teaching and this is because they are teaching subjects that they are not ma  
 jored in the course curriculum is not that good and it is not helping students to  
 be ready for the market semester exams are not that hard but the passing percentag  
 e is typically or above strict college but strictness and discipline makes you str  
 ongerto be frank college cultural events is average students getting hired by big  
 firms are less india smart and amazon are the top recruiters if we take the averag  
 e nearly to of students from every batch get placed about the salary package the h  
 ighest ctc is sports the average ctc is sports and the lowest is sports getting an  
 internship is an easy thing but quality is important getting a good internship is  
 tough some companies conduct interviews and after all no followup is sent to candi  
 datescollege infrastructure is inspired by western architecture and portuguese arc  
 hitecture the college environment is very strict boys and girls can not talk on ca  
 mpus the college library is good it is open until pm and six days a week there is  
 no proper drinking water facility on campus drinking water comes in cans the freed  
 om fee is plus a deposit mess food is there but frankly mess food is not good and  
 not hygienic there is no big canteen on campus so we can not eat when we are hungr  
 y of teachers are too bad and strict our director of management treats us pathetic  
 ally if they find a small mistake and find out the language not respectful not onl  
 y us but also our parents will get a big lecture but at the same time they are ver  
 y good at teaching our mba course duration is years and semesters semester has sub  
 jects and every subject has chapters so the curriculum is very big semester exams  
 are not very difficult almost of students pass good and well developed eco friendl  
 y college percent of students were placed with the highest package of lacs per ann  
 um and an average of lacs per annum google indian bank and walkaro were the top co  
 mpanies for our course percent of students got internships from our courses and fr  
 om toprated companiespu pondicherry also has classrooms welldeveloped infrastru  
 ctur spread over acres digital classrooms auditoriums and good freedom facilities th  
 e quality of the facilities in our freedom is good and the quality of food sportsi  
 n the mess and canteen is extremely goodthe teachers are friendly helpful highly q  
 ualified and knowledgeable the teaching quality was good it makes the students ind  
 ustryready the semester exams are very difficult at the university if we are prepa  
 red for exams it will be easy to score high in the semester hitech education and m  
 ovies are on trendas per the cultural eventss the highest package for students get  
 ting placed was lakhs per annum and the average package will be lakhs per annum no  
 t only undergraduates but most postgraduates also get placed and there are a maxim  
 um number of internship opportunities around therethe infrastructure of our colleg  
 e campus was really superb its a very hitech campus sportswith all the facilities  
 such as a mess a freedom and sports facilities its a university comprised of vario  
 us courses as each and every student focused on maintaining the decorum of our cam  
 pusour faculty members were very helpful and updated as our faculty members go on  
 with a trend they motivate students to concentrate on academics as well as extracu  
 rricular activities they help the students when they are in need and resolve their  
 problems when they are in trouble good experience here with nice teachersfrom the

th semester on you should be eligible for your cultural events work hard and attend the campus selection interviews so many students are getting placed through campus cultural events almost percent of students are being placed every year right after the degree im planning to start my own enterprise freedoms are just awesome the freedom are inside the college campus so you do not have to feel tension about going to classes mess food are also good and delicious it is hygienic and good for our health both nonveg and veg are available in all rooms there is one bed one cupboard and one table one chair etc a wifi facility is also provided to students the registration process is very easy and its done at admission time the course curriculum and faculty are good and the teaching is easy to understand i took this course because of my interest in business the faculty to student ratio is very excellent the faculty members are highly qualified and use teaching methods that are easy to understand exams are held once in a month like semesterwise and it are easy to pass class size course fee inr per year cultural eventss of this college are awesome cultural events of this college is best and around of the students get placed every year the average package offered is around lacs per annum and the highest package offered is around lacs per annum top companies like oracle microsoft amazon flipkart etc visit the campus to recruit the student infrastructure of the college and freedom is awesome freedom are good and convenient for students college and freedom provide wifi facility it also has a department of labs library and classrooms are equipped with modern board the taste of the food we get in the mess is good teachers are well qualified and they are willing to clear doubts semester exams in college are medium and is the passing marks well experienced and knowledgeable teachers are here all the teachers hold a doctorate degree in the their particular subjects i like the faculty members of this college in the rd semester students are eligible to sit for the cultural events process and the cultural events department gives regular training to make them industry ready by the time they leave the college companies come to our campus like amazon infosys wipro and deloitte etc around of students get placed every year the average package is around sports and the highest package is around sports freedoms are wifi enabled they have both ac and nonac rooms available all the freedoms have basic amenities like a water purifier a common room a recreation room a mess laundry services and a security surveillance system the registration for the freedom is very easy it is done at admission time and the rent of the freedom is affordable for students i am interested in studying business management this course gives me more confidence too there are students who are studying in my class faculty qualification is good they are giving effective communication skills they teach in extraordinary ways they conduct a monthly cycle test to improve our examination skills so we easily pass our examination class size course fees inr per year our college provides experienced teachers students were eligible for campus cultural eventss from the th semester around students from the mathematics department got placed in the previous year in one of the reputed mncs with an annual salary package of sports two students got placed in private banks the cultural events cell of some departments was not active i am preparing for higher studies freedom facilities provided in our college were good hot water and good drinking water facilities were provided in the freedom and the rooms were spacious and neat toilet facilities were good and cleaned regularly all the faculty members in our college hold doctorates and the majority of them worked as postdoctoral fellows few of them have industry relevant experience most of them were research oriented and maintained good labs but research experience depends on the person one of the best college of my life the last semester students are eligible for the cultural events as our college invites many mncs like tcs amazon wipro cognizant and many are there as these companies provide a good cultural events to the students of inr lacs per annum and the lowest is inr lacs per annum the freedom facility of our college is good as the rooms of the college are good two people are sharing one room the facility inside the room is good and the fees of the freedom is affordable the freedom has one canteen the mess dinner time is pm the food of the mess is good and the quality is also good the course of mba is good i want to start my career with this subject so i chose this subject the teachers of our college are good and very friendly with us they are well qualified and the method of teaching is very good and easily understandable the exams are conducted in every semester one of the best colleges in pondicherry around well known recruiters were present for the campus cultural events of our college with first visitors among them infosys kpmg and hcl were the top recruiting companies of the drive the highest package offered was inr sports and the average package was inr sports the freedoms had occupancy per room there

were boys freedom and girls freedom for pg and ug students every floor had bathrooms and water filters pg students were provided with attached bathroom and special single rooms at the time of admission the office gave the application form for the freedom which needs to be signed by the hod the course curriculum of the mba programme at pondicherry university was designed to give students an overview about the working environment of management in the industrial fields the faculty members of the institute were very knowledgeable and talented they adopted various techniques and methodologies to teach the course concept the course fees was inr per year vast green campus makes you feel alive and makes your time worth living at pondicherry university in mbattm course around percent of students got placed for batch the highest package was lacs and the average was lacs the lowest package was lacs the top recruiting companies were easemytrip pickyourtrail makemytrip etc all of the students got internship in various companies all over india and the top role offered was management trainee the infrastructure is quite good with well equipped labs and library wifi facility is sports throughout the campus however the speed of wifi facility is questionable the freedom facilities are quite good with proper cleaning and ample places for recreation there is canteen which is open until 10 pm at night there are big grounds and lot of areas for sports and games played of every variety teachers were well qualified and educated but the curriculum always failed to meet the standards of real world in terms of relevancy it doesn't prepare a student to be ready for facing the industry the teaching quality varied from teacher to teacher but emphasis on case study would have made it more useful and course connected it is the only college in pondicherry to provide cultural events friendly staff and infrastructure more than of the students will get placed from our course compared to any other courses it was a great achievement for management to provide job assurance for all students the highest salary of rs per month and the lowest salary of rs per month and the average salary of rs per month are offered in our college cub is the most repeated and recruiting bank in our college and some other finance base institution also recruit the students for insurance jobs the top role offered is the leader the highest salary package of sports and the lowest salary package of sports and the average salary package of sports are offered in our course internships depend upon the companies recruitment as mostly every company will offer internships about of all the students will go for internships during their project and they will be asked to do the internship in reputed recruiting companies there are good classrooms and well structured lab which can accommodate students at a time any kind of books related to knowledge development will be sports in the library along with newspapers im not a freedomer but i saw the rooms only once and they were good and well maintained in a single room members can occupy and the food served is good our college has a medical college branch so there is no issue for medical cases as it will be very active the management encourages the students who are very good at sports and to participate at various levels of matches staff members in our department were very well qualified and experienced and it was a great pleasure for us to have such type of staff members they are more friendly and at the same time were stick to college principles as far as our country education is not much developed like other countries but the course curriculum serves a bit to work staff members will guide us with some updated issues on the topic which is more useful for us absolutely dissatisfied because of the bad placement teams and its head h d f c i c i prudential cub some small private sector banks will come moderately okay but not up to the level students should enhance their skills and try off campus subject what we studied and what we work is mostly different but mba people from banking technology will get that talents from staffs and work alot compare to all management banking technology is a head of that bank internship is more helpful for banking operations so student will practices to work alotpu mba bt infrastructure is so good and well organised manner ac rooms led tv projectors usually teacher use to teach ppts and also wifi facilities so students to use mobiles and laptop for study even computer lab provides all necessary needs for students good staffs more experience faculty members are in bt department and also they have skills to cultivate good motto to student many inspiration stories is there course curriculum is so useful for doing work ratio continuous exams daily so no way to waste time assignments and some small works will be there to get internal marks absolutely satisfied with the institution around companies visited the campus for placements not less than of the candidates got selected at an average most of the top companies come for recruitment and college provides us with the sufficient recruitment training to face the interview the college helps by providing convenient online classes with book deliver

ed at home and with exam centres at various places so that the students can attend very conveniently the studies can be easily done with the latest equipment and technology we have online classroom experience with welltrained facultythere are well trained highly qualified and knowledgeable faculty members they are the best at teaching with quality and methods they share their industry experience with the students to reach greater heights they are very qualified in problemsolving this is my personal opinion and experienenowadays the placement graph is going downthe number of companies which are coming for tje campus recruitment process are very low now last year itc hdfc and some companies came but they will not come again because of the poor performance of the students in the interview the main reason is the admission as they are giving more seats for the pondicherry residents as a central university they are doing it wrongthe main advantage of the college is its infrastructure highspeed wifi is provided in both the campus and the hostel very clean and neat canteens are provided along with smart and airconditioned class rooms a very big and clean hostel mess is also available heresome faculty members are very bad in behaviour almost all of them are highly qualified and educated but last time there was a huge protest against a corrupted vice chancellor as she was coming to ru in the university and some faculty members also supported her because of that the protest lasted upto weeks at last she resigned and a new vice chancellor came i will rate this university at this is a central university which has been in existence since though the university has well established facilities it lags well behind other central and private university one thing worth mentioning is the value for money and the diversities offered in the campus as the case in all big universities and organizations the university is submerged with lots of internal politics and conflicts where the faculty personal interests are given priority rather than students life one of the best university we need to complete all semesters to be eligible for cultural eventss companies like kpmg deloitte wipro tcs reliance etc offer cultural eventss the average package is very low at around sports and the highest is around sports with some perks i am not sure about the company names or student details since i am doing ca i wont be looking for cultural eventss after the degree there are freedoms among which anyone can be allotted to a candidate the freedoms are generally equipped with basic facilities and are generally comprise of twin sharing rooms each freedom has its own food canteen where breakfast lunch snacks and dinner are provided daily there are ample options for vegetarian as well as nonvegetarian candidatesi would say some of the subjects have very minimal or no real world application like macro economic unless someone is planning to pursue this career in such field like economics i think they need to remove unnecessary subjects like management information system its just make no sense to study and remember specially i dont like to remember economics names or the year in which they were born as if its th grade exam college is the bestthe cultural events offered to us is good as college invites many big mnecs top reputed companies visited our college for cultural eventss cultural events offers are good and packages offered are up to sportsfreedom of our college is good rooms are good there are full facilities inside the room we have good mess facility food is good and varieties of food items are prepared at a time mess food is deliciouscourse curriculum of our college is good college has good teacher management teachers are highly qualified as some of them are phd holders and the way of teaching is good they use new techniques every semester during our exams the campus atmosphere is so good and has all we as students looking forbefore the end of the third semester the cultural events cell becomes active and companies start visiting the campus companies mostly banking and sales come for recruitment last year the highest package was sports after covid cultural eventss have been dropped to one can go for the ugc net exam before finishing their degree for job and career securitythe freedom is free of cost for all female students although you are required to pay the mess fee if you intend to stay in the freedom which accounts for around rs every three months you can get an education on it if you do not eat from the mess for a prolonged period of more than days and have proof regarding the samethe difficulty of the exam will be according to checking our knowledge which will help us to improve a lot faculty members are very helpful in accomplishing our goals the studentteacher ratio is very good compared to other colleges a few students will be appearing in the classroom it is a coed college and is good in all sectors the class size is class size the campus is awesome with beautiful beachesbefore the end of the third semester the cultural events cell became active and companies started visiting the campus most companies particularly in banking and sales came for recruitment last year the highest cultural events

was sports to 1 pa after covid cultural eventss fell to one could go for the ugc n et exam before finishing their degree for job and career securityfreedom were good in the first year the freedoms were good but in the second year some freedoms were bad every year they renovated freedoms the freedom fee was rs per year and the mess fee was payable every semester according to the rate of per daysome professors taught like those at iim and iit so it was best to learn from them well we could not expect marks from them but knowledge areas for improvement could have included corporate skill courses and more technical courses the frequency and timing of exams were flexible as they allotted hours for marks which was better than writing for marks in hours top class cultural events in the department of mbaalmost all the recruiters were topclass recruiters and our university got integrated with worldclass corporationour university are well known for excellence in terms of cultural eventss the average package offered to the students is about sportsmost unique envy with the different infrastructurethe student union and clubs were encouraged by the teachers considering the social responsibility of the students twowheelers were allowed for students and staff for transportationlectures are mostly knowledgeable and experienced in their respective scores they induce positive thoughts and ideas in the minds of students while submitting project reports teachers help us by clarifying errors and giving some ideas with little suitable changes dms pondicherry university reviewcultural eventss at this college are quite good but the competition is fierce the highest package offered was sports by federal bank and the lowest was sports the average package was sports the majority of students get placed but some opt to pursue further studies such as a phd program students are responsible for arranging their own internships which typically last one monththis college has all the facilities we need including unlimited wifi everywhere an airconditioned reading room a library with reference sections a stadium an indoor stadium and an outdoor stadium there is also a mess with a canteen inside the mess fees are very reasonable at only rupees per day which includes breakfast lunch tea and dinnerthe teachers at this college are very good they are helpful and well qualified and they have the students best interests at heart the teachers are well qualified as everyone possesses at least four degrees with a phd this shows that they are highly eligible to provide expanded knowledge and exposures a review of pondicherry universitythe top recruiting companies are microsoft and amazon the top roles offered are investment manager and hr manager the highest salary package offered is sports the lowest salary package offered is sports above percent of get placed around of students got internshipthe faculties and infrastructure provided by the campus in and around are just awesome the college is enabled wifi hours a day and provides the best library containing the books for all the courses the classrooms are near and the labs are well equipped with air conditioning the campus provides freedom facilities for separate freedoms for boys and girlsall the faculty members are dedicated and experts in their fields they are very friendly they graduated from top universities the course curriculum is easy to understand and gain practical knowledge the semester exams are tough and the pass percentage is the faculty staff and students make it feel like a homethe students in the nd year are eligible to get cultural eventss from this college our colleges highest package is around lakh per annum and the average package is around to lakh per annum companies visiting our college include tcs hcl amazon flipkart and more than other companies one of the best things about my college is that if there are no cultural eventss from outside companies there is a private company associated with our college that provides cultural eventss for studentsthe college actually works on the motto freedom with responsibility it encourages the student community to develop by hosting numerous events almost every day whether they are small or grand the main events include concerts and dj parties such as techlectics a tech fest hosted every two years in februarym arch mech fest hosted every year around november qubit november prisma april and numerous sports events like the civilian cup electrical cup sports day etc the arts fest is also hosted every yearthe faculty members of our college are very goodnatured and help with problemsolving while also motivating us i mostly like the chemistry group of faculty however i dislike the workshop technology faculty there is only one exam in the middle of the semester which is a class test aimed at improving internal marks and their marking scheme is very good and genuine i have liked my college environment which is surrounded by many trees and is pollutionfreestudents can sit for cultural events from the th semester this college has a great cultural events scenario with almost of students getting placed last year and an average package of lakh many small and big companies visit this college every year such as t

cs capgemini deloitte accenture and many more last year the college achieved a record cultural events of sportscetafest is conducted at the end of march every year the college houses a vast collection of books journals periodicals and other resources carefully curated to support the academic pursuits of students and faculty sports are actively played on campus the faculty at this college is very good they are well educated and really helpful and supportive to the students the college provides a mentor for every ten students so students can feel free to ask for help from their mentors the faculty to student ratio is also good the faculty and the education are very nice with reading rooms and library facilities to study students go through the cultural events process during their final year the campus provides cultural events opportunities in big companies like google microsoft apple salesforce ibm sprinklr optivar rubric graviton and many tech companies as well as core companies like texas samsung itc bajaj jlr and many others more than of students get placed through the campus cultural events process and some students secure jobs through off campus companies as well we celebrate almost all the festivals like sankranti ugadi onam christmas ramzan iftar ganesh chaturthi and bathukamma and every department has separate celebrations the library facilities are very nice and we have smart boards and projectors everywhere the relationship between the faculty and students is very kind they always keep motivating us for our bright future they are very supportive and always stand behind us to help us they prepare us so that we can easily take the examinations and score good marks i like the faculty's behavior and campus cultural events major travel companies like makemytrip easemytrip pickyourtrail ebix and others visit our department for campus recruitment the recruitment drive usually consists of a written test and an interview almost of students get placed every year our department has a dedicated cultural events committee for training and preparing students for the recruitment drive at pondicherry university all students are allotted freedom facilities so there's no need for rented accommodations if you need additional accommodation it is also sports opposite the university at an affordable price the freedom fees for a year amount to around inr currently there are five permanent faculty members and four guest faculty members all permanent faculty members are aged between while guest faculty members are aged between all of them hold postgraduate degrees in the hierarchy the dean of the school of management comes first followed by the head of the department then permanent faculty and finally guest faculty all permanent faculty members are resourceful individuals with wide knowledge of the concepts and can effectively teach the material to students guest faculty members are in training they are knowledgeable but need to develop more effective teaching strategies great atmosphere for learning and just visiting you can sit anywhere and study the cultural events are quite great those who opt for cultural events gets them the highest offer was sports from mqr or branch and average was more than lakhs per annum the companies which visited were blackrock optiver microsoft google nomura bank etc after completion of my degree i will pursue phd which is the most followed path here we have a cultural event every other year academic event the rest of the year inter batch events intercollege events teachers day faculty night where faculties perform food festivals christianity workshop festivals and so many more depends upon the dates we also conduct many workshops from different departments now and then cme meetings are held every tuesday mostly and are very social a lot of people do icmr in our college and almost proposals go in every year only from our college we have a student council and they do all the management work during events we have sports practice all day evening after pm like hockey football basketball volleyball throwball cricket etc we also go to other college events for literature and debate theatre events like movie spoof channel surfing adzap and quizzes too the faculty to student ratio is quite good which enhances the teacher student interaction a lot the faculty i liked is professor gopal krishna basak who is the dean of studies his humbleness and down to earth nature makes him different from other professors there are mainly exams mid semester and end semester as mandatory having at least to your grade and other is either taken through quizzes or assignments great atmosphere for learning and just visiting you can sit anywhere and study students become eligible for campus cultural events in the 3rd semester various excellent companies visit our college such as vedanta and apollo and they make very good offers for cultural events to the students about of students get placed and many companies come to campus to provide internship we have cultural events every other year and academic events for the rest of the year including interbatch and intercollege events teachers day faculty night where faculty members perform food festivals and various workshops from different depart

ments cme meetings are held every tuesday and the college has a vibrant social atmosphere many students do icmr projects with almost proposals submitted every year from our college we have a student council that manages all the work during events sports practice is conducted every evening after pm including hockey football basketball volleyball throwball and cricket we also participate in events at other colleges including literature and debate competitions theatre events like movie spoofs channel surfing adzap and quizzethe faculty to student ratio on campus is very good the relationship between faculty and students is outstanding and the faculty members are very appreciative and approachable there are three exams conducted in a year and almost all faculty are good and friendly exam levels are at an intermediate level the atmosphere and its people are great for internships students in the fifth semester are eligible but for cultural events the seventh semester is required some of the popular companies that visit the campus for cultural events include tcs cognizant tech mahindra pepsico accenture infosys ibm etc the highest package for the college in sports while the average package is sports pondicherry university has a very good environment the campus is peaceful and green covering square feet it features a green forest and amenities are nearly available in terms of infrastructure it is also very good festivals are thoroughly enjoyed each department has its own library where books can be referred to but not taken out the faculty members are really good they always help us with any ups and downs they listen to our problems and provide proper solutions they teach us carefully and solve all our doubts there are to professors and students per batch they conduct internal assessments and final semester examinations and the mark distribution occurs using the cgpa system which also includes percentage attendance the faculty members are very supportive and helpful to the students campus cultural events begin in the third semester many well known companies visit the campus to recruit and about of students get placed in these companies the average salary package is around lacs and the highest package is between 10 and 12 lacs per year the social aspects of campus life at this university are outstanding and the university provides excellent infrastructure to support student clubs and organizations the university is constantly improving its infrastructure which provides students with even better facilities to help them build and focus on their careers the faculty members and directors were very supportive and helpful they helped me get future opportunities more easily the exam system is per semester which means four exams in two years strict rules are followed for exams and their marking scheme is highly appreciated faculty is very good and responsible cultural events is good if students try for cultural events they will easily get placed many companies visit the college every year for cultural events including tcs accenture sbi card and collaboration in the third year you are eligible for cultural events the average package is around lacs per annum and the highest is 12 lacs about of students get placed and many students plan for higher studies after graduation nice college but the place it is situated in is not ideal as it is too small to do anything and there is no place to sit silently and relax everything must be done in a crowd wherever you go the place is not well developed freedom rooms are good with two persons in each room they come with beds a study table two cupboards a chair and a study light there is no ac facility but the rooms are still good to live in the faculty to student ratio in my college is approximately 1:10 and the relationship is good some teachers behavior is very positive my favorite teacher is dr permeshver the college organizes only one yearly exam along with internal and practical exams one of the best university pondicherry university as in our college we have a cultural events department that works very well our college has invited many reputed companies like tcs amazon flipkart jio and infotech these companies have offered us good job opportunities with packages of up to 15 lacs the freedom of our college is very good as we have both girls and boys freedoms both freedoms are housed in large buildings and the rooms are spacious the rooms are cleaned daily by the freedom staff we also have a canteen facility where we get simple food the course curriculum of our college is very good as the course is updated regularly we have some additional courses as well the faculty of our college is excellent they are humble kindhearted and highly qualified some of them hold phd degrees in every semester we have exams and i score good marks in them review of pondicherry university the students are eligible for cultural events from the final ie 5th semester of the course itc amazon vivo just dial shiksha com acres etc visited the campus for recruitment the highest package offered was sports and average package was sports more than of students got cultural events students can get freedom facilities for that you need to pay the required fees the fee is per semester overall freedom life

is good but the sanitation washrooms are on the path of development and there's a lot of room for them to get developed. Monkeys are a big nuisance when you are in a freedom room. In a freedom room, you get one wall-mounted cupboard, one table, one chair, and one bed. The food facility at our college is so good. The course curriculum at our college is so good. The MBA program is designed in such a way that it enhances the skills necessary to understand the business and its operation. The exams are held each semester and are a bit difficult. We have skilled teachers in our college. I like the campus environment because it is full of greenery. Cultural events experience: I am still pursuing my second year of MBA, so cultural events have started in the third semester and will continue in the fourth semester as well. Most of the company's offers are related to sales and marketing. Multiple companies visited my blog. The highest package is sports, and the lowest package is sports. The college provides decent freedom facilities. Students get admission in those based on their merit score. It is fully affordable for everyone. Students have to pay INR per year for a freedom. Here are three food messes/sports that provide healthy and tasty meals for one person. They charge rupees. The menu is suitable for everyone. Here, the college canteen is also available. If you have to stay in PG, they charge around per month for food facilities. Currently, I'm pursuing a Master's of Business Administration (MBA) at this college. I chose a specialization in finance. The finance faculty is superbly experienced with years of experience. On the exam side, we see that they provide a difficult level of exams. Overall, I'm happy with this college. The infrastructure of the university is good. Cultural events experience: If a student passes the 2nd semester in Masters, then the student is eligible for the cultural events and they get the offers and are placed in good companies. For a Bachelor's, he/she has to pass the 3rd semester, then he/she is eligible for cultural events. Students have to have above in their 3rd and 4th grades and maintain or above in their respective courses, and they have to maintain for cultural events eligibility. The college will provide the cultural events and provide support for life. They guaranteed the cultural events. Freedom facilities: Every room in the freedom accommodates two students. Except PhD freedoms, a room has one bed, table, cupboard, charging port, etc. A student has to pay rupees for every semester for freedom services. Every student will get a room. Except students whose home are nearby, mess fee ranges around a month depending upon the basic meal price. A month freedoms are located alongside the campus, normally near the class/course curriculum overview. I chose this course to learn more about management and grow my skills and knowledge. All the facilities are friendly. The way of teaching is good and easily understandable, and there are more supportive faculty members. The student ratio per class is members to teacher. There is no difficulty in passing these are university exams. It has more value before the university examinations. They conduct model exams and tests. It has a practice for the students. Class size: Course feels INR per year. The best place to study in the cultural events is good. Many companies visit here, offering up to Lacs. PA Barclays, South Indian Bank, Federal Bank, Bandhan Bank, HDFC Bank, Reserve Bank of India, Zafin Labs, TCS, and Axis Bank are some of the top recruiters. A percentage of students are recruited on campus every year. The management studies department has good infrastructure with WiFi, a separate library, and an air-conditioned classroom. The freedoms' life is also good, but the food is not that good. The college has two medical care units and large sports facilities with a cricket stadium, a football stadium, a multipurpose stadium for volleyball, tennis, basketball, handball, etc. and an indoor stadium. Well-experienced faculty members with immense knowledge in the domain are helpful. The course is well advanced and updated, which makes the student industry-ready. The exams are not much harder. It's the pass percentage which combines internal and end-of-semester. Elegant university for students: Almost every student was placed last year. They were placed in various major fintech companies around India. The top recruiters were Deloitte, MRF, Federal Bank, HDFC, etc. The main roles offered were data analyst, business analyst, personal banker, officer in operations, etc. WiFi and internet facilities are given to every student. At the university, football, cricket, and other major games are being held. On the university campus, mess and canteens are situated inside the university so that students are able to have good and healthy food. Teachers and tutors are very helpful in providing knowledge to students. Teachers are very friendly so students can interact very well without any ego boundaries. The course curriculum is very relevant, so studying this course will be a great opportunity. Pondicherry University highlights top-level training and cultural events are assured by the faculty members. Most of the students have been placed in top companies like SBI, HDFC, Infosys, Accenture, and many more. Internship opportunities are given to each student in the class. The highest package

e of cultural events is sportstopnotch facilities are provided wifi library and air conditioned classrooms are provided freedom and mess are included which offer good accommodation facilities food and a clean environment among students rooms are twin shared and very spacious teachers are very helpful the courses offered by the department are well established in the country the semester exams are easy compared to other universities and the courses have the best value in the country the course makes students percent ready for industry a higher number of students with good cultural events recordsthis college arranges both online and offline cultural events for students mostly they arrange oncampus cultural eventss for their students nearly companies approached our college as of cultural eventss up to of students were placed in those cultural eventssit was really superb infrastructure with all the facilities this college is only for engineering students the laboratories present in our college are maintained properly with airconditioned rooms there is a digitalized library with all the facilitiesall the teachers present here were highly helpful motivating supportive and knowledgeable it is a little bit difficult to crack semester examinations so we need to study harder to clear the examinations the faculty members present here always focus on practical classes the best central university in india my batch has a total of students most of the students are placed in various companies across india and abroad the highest package offered in this course is sports most of the students have been placed in various companies for internships the top roles offered are in sales hr etcwifi is sportsacross the university labs including a computer lab a chemistry lab a mechanical lab along with a library are sportsin the campus for the students to avail these facilities food is good and edible with a variety of choicethe teachers are very helpful and they contribute their knowledge in teaching the students most of them are highly educated and talented all the teachers are qualified and very knowledgeable they provide the best quality of education the course curriculum is very relevant and also it makes the students industry ready memories made who i am and what i am now about of students are placed the highest package is sports and the lowest package is sports the roles offered in the courses are sales specialists business analysts office workers etc the interviews are offered to all the students of the department and they are allocated to public and private sector banksthe infrastructure facilities are excellent at the university the freedoms are also very good and the canteens on campus are budgetfriendly however the quality of the mess food is not as good on the other hand sports and games at the university are very good and encouragingyes teachers are very helpful in gaining knowledge the quality of teaching is very good and they use the latest technology for teaching methods the semester exams are not very difficult an average boy or girl can easily pass them however the courses are not very comprehensive in preparing students for the industry because many subjects related to mba are missing from the curriculum students here are very good and cooperativefrom the rd semester on we can apply for cultural eventss many banks have already provided cultural eventss such as federal sib and icici bank which have completed their cultural events programs the federal bank provided the highest package which is more than a good number of students are getting jobs through this freedom facilities are good but at the time of admission it was difficult to get freedom accommodation and we were allotted dorms the freedom fee is affordable but the mess fee which is compulsory to get a freedom is a bit high compared to the food they provide one freedom room is allotted for people but the room is supposed to accommodate only people facilities are for only two people and they allot them for freedom fee inr per yearmba in banking technology are only provided by pondicherry university which makes it less competitive in the job market the university also provides cultural eventss this year cultural eventss were very few and other departments can also apply for cultural eventss provided by banks this course prepares us specifically for banks which makes job opportunities less class size course fees inr per year good college and good cultural eventss percent of the students get placed every year with the highest package offered being lacs per annum and the package offered is lacs per annum with the lowest package being lacs per annum the top recruiting companies include amazon and wipro providing major roles to the students of the students got internshipsthe colleges infrastructure is average the classrooms are neat and the labs are well equipped the library is well stocked with books along with the whole campus being wifi enabled the freedom facilities are good and the campus provides a separate freedom for both boys and girls there is a canteen sportsfor the studentsour college teachers are wellqualified and knowledgeable they have a lot of experience their teaching quality is good they are helpful to

wards the students all the faculty members have completed their phds the course curriculum is relevant the college has a passing percentage of review of pondicherry university almost percent of the students in the class have been placed in various companies and institutions these companies include tata birla etc the highest package is sports the top recruiting company is barclays each and every student has got cultural events there are various facilities provided to the students by the college including wifi computer lab library airconditioned classrooms etc freedom facilities are provided for both girls and boys both the freedoms have their own canteens for food the teachers are very much qualified to educate and teach the students and they have their doctorate degrees which in turn makes them the best professors the course curriculum is easy to study exams are conducted in an orderly manner there are four semesters with a month duration the best central university more than percentage of the students are placed in various companies from various banks to financial organizations the highest package placed is sports top companies include tcs infosys hdfc bank icici bank and many more each and every student is given various internship programs in various banks the wifi lab library facilities are top notch the wifi connection is secure strong and speed classrooms are fully air conditioned and cleanliness is a pros in the campus various entertainment programs are conducted in the campus with full participation of students teachers are very helpful and they are very much qualified and very knowledgeable the course is related to finance industry the course consists of four semesters semester exams are conducted in a very good and efficient manner exam results are outed very fast review of sri manakula vinayagar engineering college smvecour college has very good cultural events records in our college students get successfully placed the highest cultural events package offered was sports the lowest package offered was sports average offered package was between sports top recruiting companies in our course were icon elite elevators hcl etc college has good infrastructure and it was well maintained and developed college has high speed wifi labs library spacious classrooms etc the quality of facilities offered in our college was good enough college has not provided any freedom facility sports and medical facilities are sports in our college faculty of our college were helpful qualified and knowledgeable all the professors in our college were giving their best for the students course curriculum followed in our course was relevant it makes the students job ready semester exams in our college were relevant the best university of my life cultural events provided by our college is so good as in our college recently many big and reputed companies visited like tcs amazon flipkart and wipro some of the companies visited our college for cultural events activities and the package they offer us is so good inr lacs per annum the freedom facility of our college is so good we have two buildings for our freedom one for boys and one for girls our freedom has good security and the full freedom is covered under a cctv camera the room facility is also good each room has a good facility the canteen service at our college is also so good the food in the canteen is so good and tasty and the food is made with hygiene which is good for health the course of an mba is good i chose this university because our college has good teaching management as all the teachers are highly qualified some of them phd holders and the way they teach us is so easy to understand by everyone we have our examinations every semester the best university pondicherry university the cultural events activity at our college is so good the cultural events provided by our college is so good in our college last semester students were eligible for cultural events many companies visited our college for cultural events activities and the highest package we got offered was inr lacs per annum the freedom facility at our college is so good we have two buildings in our freedom one for boys and one for girls and the rooms in our freedom are good and two students are sharing one room the facilities inside the rooms are so good that we love living in the freedom we have a good mess facility and the food is so delicious and good for health the course curriculum at our college is good the course of the mba is so good i loved this course so i chose it because the teaching facility at our college is so good all the teachers are good to students as their methods of teaching are so good all the teachers are highly qualified as some of them are phd holders and the exams are conducted every semester on time it is a very good college almost of students got placed in our college the internship percentage is the infrastructure of our college is very good our college has a peaceful environment we have labs and a library there are no freedoms in our college all teachers are very helpful good and highly knowledgeable their teaching methods are understandable it is not difficult to pass exams our teachers help us to study for exams they are very kind and supportive it is on

e of the best universitiesour college provides very good cultural eventss the aver  
 age salary package offered is sports the lowest salary package offered is sports m  
 any reputed companies visit our college for cultural eventss almost of students go  
 t placed in our collegethe freedom facility is very good it has two buildings one  
 freedom building is for girls and the other freedom building is for boys the freed  
 om rooms are good and clean we have a good mess facility it provides food three ti  
 mes a day the quality of the food is very goodthe course is very good we have good  
 teachers they are friendly very kind and polite they use unique methods while teac  
 hing they explain well exams are a bit difficult to pass we can score good marks b  
 y attending classes regularly it is one of the best collegethe cultural events ce  
 ll of our college is very good the finalyear students are eligible for campus cult  
 ural eventss many reputed companies visit our college for cultural eventss many st  
 udents got placed in companies the salary package offered is sportsthe freedom fac  
 ility is very good it provides good environment the freedom rooms are very good ar  
 ound two students can stay in one room our college provides wifi the freedom has a  
 canteen it provides very good foodthe teaching quality is good we have good teache  
 rs they are highly qualified some of them are phd holders their teaching methods a  
 re very good exams are conducted every semester it is one of the best colleges for  
 an mbaour college provides good cultural events opportunities mnscs visit our colle  
 ge to recruit students top recruiting companies are tcs reliance amazon flipkart e  
 tc almost of students got placed in our college they offer good salary packages th  
 e salary package offered is sportsour college provides us with all facilities the  
 freedom is good our campus is good the freedom has good security our college is un  
 der cctv surveillance the freedom rooms are good and wellcleaned the freedom staff  
 members are good the food served in the mess is good they provide a variety of foo  
 d items our classrooms are smartour college has good teachers all teachers are hig  
 hly qualified they are phd holders semester exams are conducted in our college our  
 college has good faculty membersstudents start sitting for their summer cultural e  
 ventss from their st semester most of them get placed in days with the average sal  
 ary package of sports for months top recruiting companies are godrej tata reliance  
 flipkart accenture colgate etc they offered more than offers the highest internati  
 onal salary package offered is sports the average salary package offered is sports  
 almost of students got placed in our collegethe freedom facilities are good the fr  
 eedom rooms are wellsophisticated the food served in the freedom is good the freed  
 om has strict rules we should follow the rules the outing will be provided to buy  
 some things on sunday from pm pm they serve chicken curry and biryani on monday an  
 d wednesday the freedom fee is rs per yearour faculty members are good a few indus  
 try experts come to our college they teach us they conduct termend exams exams are  
 not much difficult around students can accommodate in each classroom the course fe  
 e is rs per year our college is awesome and faculty members are kindthe cultural e  
 vents percentage of our batch was as high as the major recruiters that visited inc  
 lude hcl wipro and infosys the highest salary package offered for our batch was ar  
 ound sports and the average salary package offered was around sports i got placed  
 at wipro and the salary package offered was sportsthe freedom was good they took o  
 nly rs as the freedom charge but the food was different you must adjust to the foo  
 d if you are from the northern part of india south indian food was different from  
 ours no need to take any pg freedom life was very nice with good and helpful peopl  
 ethis was a year course spanning over semesters they offered specialisation course  
 s such as finance marketing hr operations and it the course that i chose was mba m  
 arketing the first year was focused on core subjects and the paper i studied inclu  
 ded finance and economics during the second year i took a course on marketing the  
 department frequently conducted seminars and workshops in addition to class lectur  
 es this helped me in gaining practical knowledge of the field faculty members were  
 very helpful and helped me whenever i went to them with problems pondicherry unive  
 rsity is a vibefor now about of the students were placed for now and others can be  
 also placed but the package is only for everyone but maybe that is because of the  
 tourism field get holidays pickyourtrail and thomas cook are the big companies cam  
 e for recruitmentit is totally a vibe very cool campus with big roads and green tre  
 es and plants all around the campus the campus is very big and even bigger than p  
 tu the college located next to pu the campus life will be totally amazing for all  
 kind of mentality peoplefaculty members are good and the style of their teaching w  
 ill help every student to be free and open up because of the seminars presentation  
 and other sessions the faculty members see each student as an individual and see t  
 hem as they are they dont treat students like kids it is one of the best colleges

in pondicherry students were eligible for cultural events in the 1st semester many companies visited our college to recruit students the highest salary package offered was sports about of students got placed and about of students applied for the research programs after my degree i worked in an mnc the freedom facility provided by the university was quite good the freedom had good drinking water facilities the freedom rooms were good we had cupboards for keeping our items the freedom rooms had study tables the freedom provided us with coats the food served in the mess was not good enough we had a good menu and it included both south indian and north indian dishes but the taste and quality of the food were average all faculty members of our department were very good the teaching methods were very good they conducted exams as per the schedule of the university exams were conducted on time exams were not difficult to pass i am satisfied with this college many students got placed and now working in top companies the top recruiting company was sutherland many companies offered good salary packages of sports sportsour college provides us with all facilities like labs a library and medical facilities our teachers are friendly qualified and knowledgeable they give us proper notes they help us to understand the concept in a good way students can ask their doubts without any hesitation the pass percentage is around many students pass with around freedom facilities of this college is superb after the third start semester student will be eligible for the final cultural events companies like icici flipkart amazon etc the highest package is lacs average package is lacs of students get placed i want to work in the corporate get placed i want to work in the corporate world whereas as a manager i can take some decisions for the betterment of the society i stayed in a freedom they provide me with a well sophisticated room and the food was okay here the freedom will be strict and we should follow the rules the outing will be provided to buy some things on sunday from 10 am to 5 pm mon and wed night chicken curry and biriyani will be provided and the food was overall good here and unlimited too the reason to choose this course lies in my short term as well as long term goals the institute is pioneered in operation as well as analytics faculty to students ratio is all the faculty members are atleast phds and follow case based studies which focus more on application to a real world problem that includes quantitative as well as qualitative methodology class size course fees inr per year pondicherry university is one of the best universities last year around students got cultural events in various it and banking companies the highest salary package is around lakhs annum and the lowest is lakhs annum top companies are federal bank idbi bank icic bank major roles offered to students are manager junior level manager course is having around seats with for banking technology and for financial technology the whole campus is wifi enabled with an average speed of mbps labs and classrooms are air conditioned university is having a health center indoor stadium cricket stadium basketball ball and tennis court also professors are well qualified with phd in their fields the teaching quality is the best the syllabus is up to date and meets the current standards and also for future exam are little bit difficult as there are two internal exams in one semester and almost subjects in each semester the college has good cultural events and attractive infrastructure the highest package offered is sports many companies came here for internships in mba the top recruiting companies come here the college helps us get placed easily in top companies many students got internship the college has good infrastructure computer labs sports and a canteen are available all the facilities are sports on campus the faculty members are good this course curriculum is relevant it is easy to clear semester exams because of good teaching quality the faculty are well qualified and also have additional teaching certifications some are phd holders it is a small campus with very good infrastructure and supportive faculty members our college provides cultural events with sports as the highest salary package if fco tokio general insurance tata aig and icici prudential life insurance are among the top recruiters of our college all the companies offered managerial level roles ie management trainee relationship manager assistant manager etc it is a newly built campus with very good infrastructure and will develop more in near future we have an air conditioned library and a x wifi facility on campus as well as on freedom premises the food served is good for students coming from south india however north indian students will have to manage a bit teachers here are highly qualified and very supportive they are easily approachable and ready to help and guide their students anytime the course curriculum is up to the mark and very relevant its moderate teachers are quite lenient and you will easily get good marks if you focus in daily classes complete learning space for younger generation with well equipped campus and best faculty members of students get placed the highest s

alary is k per month lowest salary per month and the average salary k per month mi  
 lekal cub hdfc kotak mahindra bank sutherland are the recruiting companies senior  
 hr manager is the role offered of students get internship each year highest averag  
 e pack lac per month average k ler month lowest k per monthwe have lab facilities  
 for all department and free wifi there is a library the classrooms are fully equip  
 ed with high class infrastructure our college provides good freedom facility with  
 neat and hygenic canteen medical emergency is provided by the nearby hospital of o  
 ur own college we celebrate sports day each year in our campusteachers are the pil  
 lars of this college they are highly qualified and helpful they provide many oppor  
 tunities to the students the curriculum is highly relevant and helpful for us in t  
 he future absolutely satisfied with the pondicherry university course for mba in h  
 rm cultural events as university sends emails to all the candidates for the campus  
 selection for the cultural events we have to reach pondicherry university campus a  
 s it was an online schedule however for the different candidates who are staying f  
 ar away from pondicherry it was difficult but whoever got there was placedits dde  
 online pondicherry university course which i joined and education which they provi  
 de over the platform is very good and they also teach very well they have good men  
 tors they provide good materials for learning and they also have videos for teachi  
 ng and learningit is really course whichever course you join that provide good mat  
 erials and their relevant to the course the online tutors are very helpful as they  
 prepared the course themselves and they teach online over web platforms where the  
 life interaction goes on obviously its a good experience and feeling to get degree  
 from such a prestigious universityi have done my mba in ib in pu in distance learn  
 ing it was such a nice experience and professors are way beyond the expectations i  
 have classmates from different ages and professions exams and syllabus were in hig  
 h quality just like a fulltime degree all over it was a good experience and learni  
 ng space you could get to see and mingle with different people and cultureyes sinc  
 e it is a central university every facility is available the environment is beauti  
 ful and clean freedom wise there are many to respective degree security is at a hi  
 gh level and there would be more rules and regulations to be followedyes teachers  
 were awesome and knowledgable they have wide knowledge across the course and subje  
 ct every exam was handled with a high level of iq evaluation is also perfect and o  
 ur curriculum is in perfect mode to the degree it has more of practical knowledge  
 university was good at each and every activityaround of students got placed in bat  
 ch the average salary offered is of sports in top companies that come for cultural  
 eventss are banking and technology sector companies like tcs hdfc icici karur vyas  
 a bank etc top roles offered were a management role almost of students got an inte  
 rnship in public sector banksfacilities are well developed we have a highspeed net  
 work at our campus university library is one of the top libraries in india univers  
 ity gives space for games to the studentsthey were knowledgeable and had good comm  
 and in the subject which gives us extra knowledge students are industryready becau  
 se university gives them a compulsory internship where students can gain work expe  
 rience a well established school with knowledgeable faculty members and diversifie  
 d culturestudent from different culture are studying in my college right now in my  
 section one student from afganistan is studying with us the culture of pondicherry  
 university is so diversified dms department of management studies is the oldest sc  
 hool of this university it established in as law passed to be a central university  
 it emphasized its name and fame throughout the past years as my faculty members to  
 ld me in past days almost students come to study from almost different states the  
 surroundings and infrastructure of this university are way better than other centr  
 al universities the procedure to get into mba in this university is through cat al  
 most seat filled up courses offered by dms are mba dual specialisation and busines  
 s analytics business analytics has been started from this year only the highest ct  
 c is lacs the lowest is around lacs top recruiting companies are itc hdfc icici et  
 c as summer internship is compulsory so everyone done their internships from diffe  
 rent top companies they have done internships from the far away north places like  
 delhi amritsar to southern parts like bangalore chennai cochi well i like the most  
 about thus university is the vast library serene and peace place and most importan  
 tly diversified culture so i will suggest this university in the scale of out of t  
 hank you rkinfrastructure of dms is way more than enough consisting of digital cla  
 ssroom and wifi its pretty well for studies but the buildings were of years back s  
 o its not that much charming for eyes but classrooms are clean the department has  
 its own seminar hall lecture hall department has two wifi facility so you can use  
 any of one anand rangapillai library is one of the best libraries throughout the c

country it has a separate department of mba students it has some most valued books actually personally i like the most is the library you can get any type of knowledge you want from this library well you can access to the ebooks online sources i am living in aurobindo freedom right now which was built just before two years well it is a five floor building the infrastructure is well far more than i thought you can find different art in different rooms you will be glorified to seeing those drawings near to freedom the grand mess is situated for availing food for almost students at a time so the food is not that much good as i belong to the north part of india i genuinely don't like the food but the food is very healthy and nutritious healthcare is open for hours one ambulance will be there always for any kind of emergencies nearby there are several government hospitals with advanced technologies university have a stadium tennis courtyard basketball courtyard and a football ground thank you r k the faculty members are very helpful they live inside the campus so if you have any type of problem you can go to them at any time they are well qualified and specialised in different departments course curriculum is very relevant we are having online tests classroom tests group discussions etc we are having a lot of assignments to gather information by which we connect to people from grassroots level we know the problems of the society and how to tackle it we go through different curriculum to develop our personality and attitude we got to know about different ethics and roles of our own towards society we learn how to self sustainable for any type of situations that we are going to face as a manager thank you r k the diversified university in the batch about of students already got placed in icici the highest salary package offered was more than sports and the lowest salary package offered was more than sports top recruiting companies are icici itc decathlon etc top roles offered are finance hr operations marketing business analytics they don't give any offer to you but the cultural events committee will work for your cultural events the college provides internships to the students we had free wifi all over the university campus there are a well facilitated computer lab and air conditioned classrooms we also had the best library in india and well furnished air conditioned reading room the freedom has a wifi facility lift and all rooms are well furnished the sweepers clean the freedom every day the mess provides a wide variety of food in decent quality and taste at a reasonable price there is a health centre of jipmer which is the top medical college in india and pims hospital both are providing free treatment for students there is also a separate stadium for football cricket basketball tennis badminton etc teachers in the department of management studies are well qualified and highly knowledgeable and helpful to every student the course curriculum is relevant and it makes the students industry ready the curriculum is also changing according to the change in the business environment great course with one of the highest roi in the nation at least of every batch gets placed the highest offered last year was around lakhs and right now cultural events are already going on with icici providing sports for students the avg package is the same roles are mainly in marketing and finance students did internships in tvs and subsidiaries and some other companies pu being a central university has amazing infrastructure all classrooms are ac with projectors the central library is one of the best in the nation with a separate reading room and discussion room and plenty of free online material and courses there are multiple libraries in each branch separately and so does school of management the library is open until am from am and so are the reading and discussion rooms there is wifi all around the campus the freedoms are clean and beautiful with arts of previous students on the walls and the freedom fees is just around per year the mess has acceptable quality of food well as good as any other freedom if you have been in freedoms before but the fees is very low too k approximately there is separate department for sports so obviously if you are into sports you will have a lot of facilities sports with multiple stadiums and good equipment there are two gyms for men and women each with nominal fees there is an on campus health care center providing free medical care and medicines if anything serious there is pims just a furlong away not many know this but the usp of pu is not the beach in front of the campus but the faculty very few other schools in india have all senior faculty teaching all the faculty have more than years of experience they actually strive to make students learn through innovative ways they constantly teach in industry perspective by relating each and every concept with real examples and cases the curriculum is formed in a way that students from any background can easily pick up to management concepts i am satisfied because of good facilities and cultural events in my college around of the students got placed in good companies and rest of the students will get placed within the end of the

year as the cultural events began recently the top recruiting companies are cub mi lekal tcs etc top roles offered may differ according to the type of specialisation we choose a marketing student gets promoted to manager within years the highest salary package offered is sports the average salary package offered is sports the lowest salary package offered is sports around of the students got an internship until now in various it companies rest of the students will be offered internship within the end of the year however some students got an internship with project offers from various reputed organisations the infrastructure of our college is good with lush green and a garden in the middle of the campus there is a separate library for each department and there is a huge central library classrooms are neat the wifi facility is sports for educational purposes the quality of the food is good there are free medical facilities sports day is celebrated once a year teachers possess a doctorate degree and they are knowledgeable they interactively teach us the course curriculum is related to our industry and we are asked to solve many realtime case studies we can easily understand the subject and industry issues by solving various case studies i am satisfied due to faculty best cultural events records best infrastructure and facilities about of the students got placed the highest salary of rs per month and the lowest salary of rs per month and the average salary of rs per month are offered to students the top recruiting companies for the mba course are city union bank axis bank etc the top roles offered for mba course is the manager and senior manager the salary offered in our course is range from rs to per month about of students got internships from mba in companies like nlc indian bank etc facilities and infrastructure sports for the course of mba department are excellent in sri manakula vinayagar engineering college facilities include wifi facility labs classrooms are well equipped and the library has the maximum content for our course the food quality served in the mess and canteen is good staff members are well qualified knowledgeable and helpful to fulfil our needs in studies the quality of their teaching is more related to the future scenario of the world the mba course curriculum is relevant the curriculum is now added with new chapters to improve the quality of study based on industry expectation it is a perfect college for students and they also get cultural events assurance almost of the students got placed the highest salary package offered is sports the lowest salary package offered is sports the average salary package offered is sports city union bank is the top recruiting company finance is the top role offered to students almost of the students got an internship with different mncs top companies visit our campus for cultural events in our courses the salary package would satisfy both the employee and that particular company the infrastructure of the college is very good and the wifi facilities are also perfect the freedom is also very good there are more than three canteens on our campus and the food served in the mess is nice the infrastructure of the canteen is also super medical facilities are sports near our campus teachers in our college are well experienced well qualified and knowledgeable the teaching quality shows how they are well experienced the course curriculum is super they provide practical knowledge about the study and everything is perfect in our college best mba college in pondicherry cultural events of our university goes up to an average of sports in master of business management and faculty also supports a lot in this concern institute has an training and cultural events cell which helps the students a lot in grooming the students for the cultural events process and provides lot of live projects from the corporate offices near by and students also actively participate in the cultural events process infrastructure is one of the best things about the campus in terms both sports as well as academic infrastructure this has very good air conditioned labs and aluminies of this colleges also comes in handy for having good infrastructure of the college it hosts many sport festivals through the year and brings students from all universities across india with this kind of infrastructure lot of ngo activities are also made possible with the help of alumni helps our college has got some of best management faculty who are actively participate with the student activities and encourage the students to take up good social activities and faculty members bring lot of research projects by which students are benefited by taking those projects and improve academically course curriculum this college has some absolute grading system and lot of good projects are involved in this courses and with this kind of good faculty members the students take step forward for over all development of tier career this college provides good opportunities for students in india the responsibility of hod is to arrange cultural events for students they share interview details in the classes about cultural events that are held in the previous year they analyse the cultural events details and

d they provide proper information to students for students development they motivate us to get selected on the campus cultural events the college has the basic and physical organisational structure and facilities like playground extracurricular activities etc although there must be medical facilities provided on campus for students safety there are different sports and games on the campus one should follow all the rules that are there in the college i love my college faculty members and how they also provide additional activities for the development of students and they implement skills and communication activities for students they organise day to day seminars to develop the skills of students they help students in all aspects and they solve every problem this college is a good option for mba tourism department works well to make every student placed thankfully our batch and our senior batch got cultural events with an average package of lacs per annum tourism giants like thomas cook soc fcm club mahindra carlson wagonlit etc recruited our students as it is a central government institution infrastructure was good classrooms were air conditioned we do have a separate departmental lab with an internet connection tourism lab wifi canteen etc were sports at the department good faculty members who are specialised in the tourism hospitality management and airline industry are sports in this college the faculty members are very student friendly and active active participation is encouraged in cocurricular activities such as events tours celebrations etc the review of dms pondicherry university the department is doing well for the cultural events of the students the students got placed in well reputed companies like itc decathlon cub tcs axis bank ccd etc this year the return on investment is high as you get mba for only k from here the campus life is the main attraction in pondicherry university the classrooms are well equipped with ac and projector and there is a high speed internet provided with wifi the library is good with a huge collection of academic books and there is a computer centre having access to the journals for students the management department is the first and popular department in pondicherry university the faculty members are the greatest resources of the department of management studies the high profile peoples from academic and industrial backgrounds with knowledge and experience are the backbone of the department they are all can be approached at any time as they are ready for any help on academics i am satisfied with this college many students got placed and now working in top companies the top recruiting company was sutherland many companies offered good salary packages of sports sportsour college provides us with all facilities like labs a library and medical facilities our teachers are friendly qualified and knowledgeable they give us proper notes they help us to understand the concept in a good way students can ask their doubts without any hesitation the pass percentage is around many students pass with around sports the college has good cultural events and attractive infrastructure the highest package offered is sports many companies came here for internships in mba the top recruiting companies come here the college helps us get placed easily in top companies many students got internship the college has good infrastructure computer labs and a canteen are available all the facilities are sports on campus the faculty members are good this course curriculum is relevant it is easy to clear semester exams because of good teaching quality the faculty are well qualified and also have additional teaching certifications some are phd holders sports realm of quality education there is an advanced health centre with emergency services only integrated courses are sports for ug otherwise all courses are pg each course has its own buildings and departments will full facilities almost students are getting internships in different organisations companies like iirs isro but as per performance in college there are separate freedoms for ug pg and research scholars rooms are spacious you will get hours electricity with power backup free wifi connection is there in each freedom and buildings mostly you will get south indian food in mess there is an advanced health centre with emergency services different courts playgrounds are there you may play any games at any time teachers are very helpful qualified and knowledgeable but sometimes you may face an issue regarding teaching quality they prefer english as a mode of teaching first three years course curriculum is not relevant to industrial use but somehow these concepts and teaching really matters sports great course with one of the highest roi in the nation at least of every batch gets placed the highest offered last year was around lakhs and right now cultural events are already going on with icici providing sports for students the avg package is the same roles are mainly in marketing and finance students did internships in tvs and subsidiaries and some other companies pu being a central university has amazing infrastructure all classrooms are ac with projectors the central library is one of the best in the nation with a separate reading room

m and discussion room and plenty of free online material and courses there are multiple libraries in each branch separately and so does school of management the library is open until am from am and so are the reading and discussion rooms there is wifi all around the campus the freedoms are clean and beautiful with arts of previous students on the walls and the freedom fees is just around per year the mess has acceptable quality of food well as good as any other freedom if you have been in freedoms before but the fees is very low too k approximately there is separate department for so obviously if you are into you will have a lot of facilities sports with multiple stadiums and good equipment there are two gyms for men and women each with nominal fees there is an on campus health care center providing free medical care and medicines if anything serious there is pims just a furlong away not many k now this but the usp of pu is not the beach in front of the campus but the faculty very few other schools in india have all senior faculty teaching all the faculty have more than years of experience they actually strive to make students learn through innovative ways they constantly teach in industry perspective by relating each and every concept with real examples and cases the curriculum is formed in a way that students from any background can easily pick up to management concepts sports the course is excellent to study excellent cultural events opportunities in the field of banking and as well as it sector the cultural events training is also well scheduled and coordinated the reputed companies and banks are coming for cultural events every year the cultural events is also done in marketing field group discussion general aptitude and role play are practised daily about to seniors get cultural events every year alumni also help in cultural events axis bank hdfc bank tcs and small financial banks visit the campus for cultural events the highest salary is about sports and the lowest is sports all should go for the internship while doing the course the maximum stipend of rs and the minimum of rs are offered for every period of a semester the wifi is enabled on the whole campus campus connect is given to every student the classrooms are large enough and people can sit comfortably the library is very vast and has more than lakh books there is a pims hospital sports on the campus are encouraged very well labs and classrooms are provided with high tech facilities the food in the canteen is moderate no issues are faced regarding infrastructure during the tenure of the college the faculty are well experienced and as well as great researchers in their respective field they were helpful in entire course and qualified higher than they are required to be and more knowledgeable in their field they use a lot of methods like workshops gaming learning industrial learning practical learning and self learning the faculty to student ratio is we got a lot of industry exposure the course is very useful sports this college provides good opportunities for students in india the responsibility of hod is to arrange cultural events for students they share interview details in the classes about cultural events that are held in the previous year they analyse the cultural events details and they provide proper information to students for students development they motivate us to get selected on the campus cultural events the college has the basic and physical organisational structure and facilities like playground extracurricular activities etc although there must be medical facilities provided on campus for students safety there are different and games on the campus one should follow all the rules that are there in the college i love my college faculty members and hod they also provide additional activities for the development of students and they implement skills and communication activities for students they organise day to day seminars to develop the skills of students they help students in all aspects and they solve every problem sports the best place to boost your career the cultural events are good in this university i too got placed in a coffee day global limited division coffee day beverages other companies like tcs oyo infiniti software solutions itc and many more in the end it totally depends on the candidate how much he/she is capable of getting himself/herself placed mostly the average salary offered here is in the slab of lac per annum but some companies do offer more than this e.g. tcs offered lacs per annum hdfc bank offered lacs per annum etc mostly companies come for the sales job and banking sector job almost of our batch got placed but from our senior batch around of them got placed some companies provide internship for around months before the actual joining with a stipend of around k per month since it is a central university all the facilities are very good the library is separate and also there is a separate annexe for studying which is wifi enabled as well as air conditioned the classrooms are air conditioned and wifi enabled freedom rooms are pretty much good there are no air conditioned freedom rooms but every freedom has got high speed wifi networks there are around boys freedoms and girls

In freedoms there is a separate medical hospital which is run by both government medical officer and also Pondicherry Institute of Medical Sciences. Pimpri where doctors are sports labs facilities are also very good and also so many useful and helpful resources journals etc are there which anyone can access grounds for football volleyball basketball cricket etc are there even a gym is sports which is separate for boys and girls there are overall canteens on the university campus which provides healthy and hygienic food at very reasonable prices. In starting I faced a problem with wifi but in the next year this problem also got resolved when I was coming out of that freedom I didn't actually feel good to leave that room as it was the best room in the entire freedom. All the faculty members were helpful even of the other departments whenever I tried to reach out to any faculty of any department for any issue they resolve the issue without being biased with their own department students only they are highly qualified since it's a central university so the hiring process is also done on a very strict basis. The teaching methods used at my time were both verbal as well as digital. The teaching quality of every faculty was up to the mark even above only in our batch there were students and faculty members all the faculty members are highly qualified professionals with industry experiences and teaching experience of average years some are with an experience of years also we got the industry exposure our batch visited Bangalore Chemical and Fertilizers MCF and New Bangalore Port Trust as our industrial visit. The course curriculum was helpful sports a unique and vibrant Pondicherry University. Your previous batch and our batch both got very good cultural events in our batch it was cultural events it means whoever sat for campus cultural events got the job the highest salary was Rs per month and lowest was Rs per month for our campus cultural events. Many companies like Thomas Cook, SOTC, Cox King, Pick Your Trail and Indian Travel House came mostly tour executive job was offered by the companies that job also categorised in sales and operation in our department everyone has to go for the internship some people got the stipend and some didn't we can say highest stipend was Rs for working days. Pondicherry University is fully wifi connected campus there are many facilities like library medical facilities for students and staffs there are three stadiums for there are buses for students and faculty daily from city to university and vice versa on every minutes you can get the bus in the campus for visiting university labs are well equipped and classrooms are fully furnished and well equipped with modern technology the freedom rooms are sports for each student who comes from outside the Pondicherry University doesn't have a swimming pool this is a major concern in the college in my view the faculty are qualified and knowledgeable the only problem is there is less number of faculty in each department due to that they have to depend on the guest faculty the student-faculty ratio is very less in some department there are students in one batch and some department has only students if we include guest faculty the student-faculty ratio is good earlier the university was lacking for a permanent vice chancellor but now the university has a permanent vice chancellor most of the student gets the industry exposure because in course curriculum there is provision for every student for days internship the curriculum is very flexible students can choose soft course also apart from his main course soft course may be different subject apart from the main subject the course curriculum is updated with present demand for every three years they review the curriculum sports it was awesome university I am proud that I got masters from such kind of great university it's a centralized university which offers masters in various field and masters in business administration in marketing was great experience I love this university because of campus and recruitment records faculty growth and staff in short I can say it's a combo of learning with fun encouragement of is also there in the college and many of state level and national level champion has given by this university sports it is a very good college almost of students got placed in our college the internship percentage is the infrastructure of our college is very good our college has a peaceful environment we have labs and a library there are no freedoms in our college all teachers are very helpful good and highly knowledgeable their teaching methods are understandable it is not difficult to pass exams our teachers help us to study for exams they are very kind and supportive sports memories made who I am and what I am now about of students are placed the highest package is sports and the lowest package is sports the roles offered in the courses are sales specialists business analysts office workers etc the interviews are offered to all the students of the department and they are allocated to public and private sector banks the infrastructure facilities are excellent at the university the freedoms are also very good and the canteens on campus are budget friendly however the quality of

the mess food is not as good on the other hand and games at the university are very good and encouraging yes teachers are very helpful in gaining knowledge the quality of teaching is very good and they use the latest technology for teaching methods the semester exams are not very difficult an average boy or girl can easily pass them however the courses are not very comprehensive in preparing students for the industry because many subjects related to mba are missing from the curriculum sports is the best place to study in the cultural events is good many companies visit here offering up to lacs pa barclays south indian bank federal bank bandhan bank hdfc bank reserve bank of india zafin labs tcs and axis bank are some of the top recruiters a percentage of students are recruited on campus every year the management studies department has good infrastructure with wifi a separate library and an air conditioned classroom the freedom's life is also good but the food is not that good the college has two medical care units and large with a cricket stadium a football stadium a multipurpose stadium for volleyball tennis basketball handball etc and an indoor stadium well experienced faculty members with immense knowledge in the domain are helpful the course is well advanced and updated which makes the student industry ready the exams are not much harder is the pass percentage which combines internal and end of semester facilities great atmosphere for learning and just visiting you can sit anywhere and study the cultural events are quite great those who opt for cultural events gets them the highest offer was sports from mqr or branch and average was more than lakhs per annum the companies which visited were black rock optiver microsoft google nomura bank etc after completion of my degree i will pursue phd which is the most followed path here we have a cultural event every other year academic event the rest of the year inter batch events intercollege events teachers day faculty night where faculties perform food festivals christianity workshop festivals and so many more depends upon the dates we also conduct many workshops from different departments now and then cme meetings are held every tuesday mostly and are very social a lot of people do icmr in our college and almost proposals go in every year only from our college we have a student council and they do all the management work during events we have practice all day evening after pm like hockey football basketball volleyball throwball cricket etc we also go to other college events for literature and debate theatre events like movie spoof channel surfing adzap and quizzes too the faculty to student ratio is quite good which enhances the teacher student interaction a lot the faculty i liked is professor gopal kishna basak who is the dean of studies his humbleness and down to earth nature makes him different from other professors there are mainly exams mid semester and end semester as mandatory having at least to your grade and other is either taken through quizzes or assignments sports great atmosphere for learning and just visiting you can sit anywhere and study students become eligible for campus cultural events in the 3rd semester various excellent companies visit our college such as vedanta and apollo and they make very good offers for cultural events to the students about 10% of students get placed and many companies come to campus to provide internships we have cultural events every other year and academic events for the rest of the year including interbatch and intercollege events teachers day faculty night where faculty members perform food festivals and various workshops from different departments cme meetings are held every tuesday and the college has a vibrant social atmosphere many students do icmr projects with almost proposals submitted every year from our college we have a student council that manages all the work during events practice is conducted every evening after pm including hockey football basketball volleyball throwball and cricket we also participate in events at other colleges including literature and debate competitions theatre events like movie spoofs channel surfing adzap and quizzes the faculty to student ratio on campus is very good the relationship between faculty and students is outstanding and the faculty members are very appreciative and approachable there are three exams conducted in a year and almost all faculty are good and friendly exam levels are at an intermediate level sports i have liked my college environment which is surrounded by many trees and is pollution free students can sit for cultural events from the 3rd semester this college has a great cultural events scenario with almost 10% of students getting placed last year and an average package of lakh many small and big companies visit this college every year such as tcs capgemini deloitte accenture and many more last year the college achieved a record cultural events of sports ceta fest is conducted at the end of march every year the college houses a vast collection of books journals periodicals and other resources carefully curated to support the academic pursuits of students and faculty are actively played on campus the faculty at this college is very

good they are well educated and really helpful and supportive to the students the college provides a mentor for every ten students so students can feel free to ask for help from their mentors the faculty to student ratio is also good sports the faculty staff and students make it feel like a home the students in the 4th year are eligible to get cultural events from this college our college's highest package is around 10 lakh per annum and the average package is around 5 lakh per annum companies visiting our college include tcs hcl amazon flipkart and more than other colleges one of the best things about my college is that if there are no cultural events from outside companies there is a private company associated with our college that provides cultural events for students the college actually works on the motto freedom with responsibility it encourages the student community to develop by hosting numerous events almost every day whether they are small or grand the main events include concerts and dj parties such as techlectics a tech fest hosted every two years in february march mech fest hosted every year around november qubit november prism april and numerous like the civilian cup electrical cup etc the arts fest is also hosted every year the faculty members of our college are very good natured and help with problem solving while also motivating us i mostly like the chemistry group of faculty however i dislike the workshop technology faculty there is only one exam in the middle of the semester which is a class test aimed at improving internal marks and their marking scheme is very good and genuine events our college has good infrastructure almost all students got placed in our course the highest salary package offered was sports the lowest salary package offered was sports top recruiting companies were hcl integra etc top roles offered were developer and web designer about 80% of students got internships from our course our college provided many facilities like wifi computer labs and a library our college library was the third largest library in the state of tamil nadu our college provided freedom facilities for students who were far from the distance of 10 km away from the college both air conditioned and non air conditioned rooms were available the food served in the canteen was good the campus was clean medical facilities were sports for emergencies teachers were well trained and experienced they taught us very well and provided extra knowledge across from studies this course is basic for computer studies the course made students grow higher level in the world of technology and made students industry ready semester exams were easy to pass but to score the highest marks students worked hard the passing mark was 50% sports review of saradha gangadharan college overall it is a good college of students get placed every year our college brings in good companies like zoho tcs etc so it is good to study in this college no worries about getting a job as you can get placed in your 4th year itself our college has a canteen bus facilities freedom ethotech labs etc our college has a library many classrooms computer labs and mechanical labs our college provides good infrastructure lab facilities are good our college is affiliated with pondicherry university so it is very helpful to place students in companies our college teachers teach practically so that students get ready for cultural events our college is autonomous so it has more faculty members than other universities sports i am satisfied because of good facilities and cultural events in my college around 80% of the students got placed in good companies and rest of the students will get placed within the end of the year as the cultural events began recently the top recruiting companies are cub milekal tcs etc top roles offered may differ according to the type of specialisation we choose a marketing student gets promoted to manager within years the highest salary package offered is sports the average salary package offered is sports the lowest salary package offered is sports around 5 lakh the students got an internship until now in various it companies rest of the students will be offered internship within the end of the year however some students got an internship with project offers from various reputed organisations the infrastructure of our college is good with lush green and a garden in the middle of the campus there is a separate library for each department and there is a huge central library classrooms are neat the wifi facility is sports for educational purposes the quality of the food is good there are free medical facilities is celebrated once a year teachers possess a doctorate degree and they are knowledgeable they interactively teach us the course curriculum is related to our industry and we are asked to solve many realtime case studies we can easily understand the subject and industry issues by solving various case studies day best mba college in pondicherry cultural events of our university goes up to an average of 10 lakh in master of business management and faculty also supports a lot in this concern institute has an training and cultural events cell which helps the students a lot in grooming the students for the cultural events process and

provides lot of live projects from the corporate offices near by and students also actively participates in the cultural events. Infrastructure is one of the best things about the campus in terms both as well as academic infrastructure. This has very good air conditioned labs and aluminies of this colleges also comes in handy for having good infrastructure of the college it hosts many festivals through the year and brings students from all universities across india with this kind of infrastructure lot of ngo activities are also made possible with the help of alumni. I helps our college has got some of best management faculty who are actively participate with the student activities and encourage the students to take up good social activities and faculty members bring lot of research projects by which students are benefited by taking those projects and improve academically course curriculum. This college has some absolute grading system and lot of good projects are involved in this courses and with this kind of good faculty members the students take step forward for over all development of tier careers. Sports complete learning space for younger generation with well equipped campus and best faculty members of students get placed the highest salary is k per month lowest salary per month and the average salary k per month. Milekal cub hdfc kotak mahindra bank sutherland are the recruiting companies senior hr manager is the role offered of students get internship each year highest average pack lac per month average k per month lowest k per month. We have lab facilities for all department and free wifi there is a library the classrooms are fully equiped with high class infrastructure our college provides good freedom facility with neat and hygenic canteen medical emergency is provided by the nearby hospital of our own college we celebrate each year in our campus. Teachers are the pillars of this college they are highly qualified and helpful they provide many opportunities to the students the curriculum is highly relevant and helpful for us in the future. Day good college and good cultural events. Approximately of students have been successfully placed in our college with the highest salary package being sports and the lowest salary package being sports. Notable hospitals where our students have been placed include nanavati super specialty hospital manipal hospital and apollo hospital the top roles offered to our students are staff nurse and military nurse additionally of our students have secured internships. The facilities at our college are excellent with well equipped labs and spacious classrooms that adequately accommodate students we offer a variety of including interbranch competitions and festivals additionally our college boasts a canteen that offers a wide range of food options in a hygienic environment moreover we have various such as cricket and basketball sports on campus. Our teachers are good and well experienced they give projects they provide good knowledge about cultural events. They conduct exams strictly and they give many important questions for our examination the course curriculum is superb the pass percentage is higher at our campus this year. Activities absolutely satisfied because of the course opted. Faculty good infrastructure and canteen facility. The maximum seat in bsc zoology was when i joined there is no donation or college fee the joining fee is rs and they ask for only an exam fee semester fee for each semester as it is a government college especially for women there is no cultural events facility mostly it rarely happens. In when it comes to infrastructure the classrooms will be quite congested there is no wifi facility labs are well maintained with equipment both the common library and the department library are there no freedom facility is there the canteen is hygienic and can provide a variety of foods at an affordable price one can participate in a variety of and games conducted every year. Professors are very helpful qualified and knowledgeable the quality of teaching is excellent if one attends the class regularly they can easily crack the exam the curriculum makes the students ready for the industry one must pass both the theory and practical exams the pass percentage is sports review of sri manakula vinayagar engineering college smvecour college has very good cultural events records in our college students get successfully placed the highest cultural events package offered was sports the lowest package offered was sports average offered package was between sports top recruiting companies in our course were icon elite elevators hcl etc. College has good infrastructure and it was well maintained and developed college has high speed wifi labs library spacious classrooms etc the quality of facilities offered in our college was good enough college has not provided any freedom facility and medical facilities are sports in our college. Faculty of our college were helpful qualified and knowledgeable all the professors in our college were giving their best for the students course curriculum followed in our course was relevant it makes the students job ready semester exams in our college were relevant. Sports excellent college with good faculty members and cultural

eventsswe were in our class mostly of our students have been placed in our own mother hospital nursing is the course offered for our students all the students would be allowed to do internships at our own mother hospital they recruit mostly at the mother hospitalthere are labs for various departments in our college classrooms were well furnished with comfortable chair the library was good with adequate books for reference the freedom and the mess were good all the facilities like and medicine were sports all the faculty members were wellqualified and knowledgeable they helped a lot of us secure good marks in our curriculum the exams would be a bit difficult but its easy to crack on the first attempt of the results were given in our batch its all because of our faculty memberssports good cultural eventss and great teachingthe cultural events rate is close to with the highest package offered at sports the lowest is sports and the average is sports top recruiters are from a pollo fortis and max all students get internships the top roles after this course are clinical instructor and staff nursethe facilities are excellent with wifi good simulation labs and a wellstocked library the freedoms are clean and secure with basic amenities the food is decent and the canteen options are good medical facilities are excellent with an inhouse hospital there are average and limited options teachers are highly qualified and knowledgeable and they are supportive the teaching quality is outstanding interactive and case studybased the curriculum is industryrelevant and researchbased exams are challenging with a pass percentage close to the faculty also goes beyond the syllabussports mother teresa post graduate and research institute of health sciences in pondicherry universityin this course there are a total of batches and there are a total of students in the batches in this class there are a lacs to lacs package by the industrial company and hospital this course has a total of percent of students placed in companies every year and does not offer any roles to the college this college infrastructure is very superb and provides many facilities of the product like fast wifi classrooms labs library garden gym khana etc facilities are sportsin this college this college organises every year and games tournaments for every student but participation in the is paid for these college teachers are very nice teachers who provide excellent teaching it is very fortunate that highly qualified teachers are sportsin this college these college teachers are very helpful to the students in practical and lecture classes this course is a to years duration course and to semester exams are conducted by the university sports mother theresa post graduate and research institute of health sciences for bsc nursing admissionthis college provides the best package and places to percent of students every year in this college many companies provide internships and the high package is based on experience and skills in this course percent of students pass out every yearthis colleges infrastructure quality is very good and uses highquality products like fans classrooms bathrooms branches drinking water machines libraries etc facilities are provided by the college in this college the team and faculty team organize games and cultural eventsin this college teachers are very intelligent and provide very highquality knowledge to the students in this college teachers have highdegree qualifications and high teaching knowledge and experience this course is a total of to years in duration and semester exams are organized by pondicherry universitysports teachers are extraordinary well qualified teachers and friendlyin this college of students were placed in many companies the management arrange the cultural eventss for students in top private companies every year msc computer science students are placed in tcs infosys wipro ug and pg courses are availableinfrastructure is very good big building with wide playground and games are available library class labs neat and clean super infrastructure in cricket is special in college wifi enable college staffs are excellent in puducherry best arts and science private college recognized by pondicherry universityteachers are extraordinary well qualified teachers and friendly pass percentage is students make projects the management conduct job fair semester exams are easy for student teaching quality is good experience staff with well knowledge is there in the collegesports there are friendly faculty members and you will get a good job for a good lifeabout of the students got placed in campus drives during the course the highest salary package offered was sports and the lowest salary package offered was sports the average salary package offered to students was sports top recruiting companies for our course were jaro education city union bank lt icici securities technosoft etc senior associate hr generalist assistant manager marketing executive etc are the top roles offered in our course about of the students got internships in mncs where they have done their project work alsoi utilised the infrastructure very well the lecture room was very spacious there were a seminar hall and conference hall

all for events and other activities which are highly airconditioned and equipped with projector and speakers always i used to read a lot of magazines which is useful to know day to day updates on current market scenario and trends of the market as i am a day scholar i dont know much about the freedom but i tasted the mess food which is very healthy and hygienic to eat there are both vegetarian and nonvegetarian food items on the menu the canteen sports in our college was good but more lunch recipes can be provided for vegetarian eaters i was taken to the hospital a few minutes due to health issues ie fever the tournament will be conducted once a year where students from different colleges participate eagerly all the faculty members here were well qualified for both teaching and providing industrial exposure they used to share valuable information with students to the next level the course curriculum is not much relevant to the current industry but few concepts will apply in one way or the other way our college used to arrange various industrial exposure programs to learn more from industrial tieup partners of our colleges sports it provides good location experienced professors and well equipped laboratories this college has good cultural events in our department various companies visit our campus to hire students but students prefer to go for government jobs or set up their diabetics clinic it provides wifi big mess and there is a medical health center in this university it also provides various courts and stadiums many games events are conducted it has well experienced professors and management sports in the department it has a cbcs curriculum based on guidelines and exams are good if students learn something sports review of pondicherry university cultural events here are above average and students can freely think and talk the entrance exam was easy and students were selected according to their entrance exam marks there is also coaching for net exam phds are sports under highly graduated hods and professors students can choose an internship according to their interest the quality of food served here is poor there are good stadiums especially cricket and football stadiums freedom rooms are also good and the mess is clean there is also a huge library named amanda rangapillai library which has all books and wifi connectivity the library is open from morning am to pm at night exams are easy here pass marks are out of marks faculty members here are highly educated and talented the professors are graduated from foreign universities and highly qualified assignments and seminar presentations are provided here national level seminars are also conducted yearly events an honest review of pondicherry university in my course of students got placed it is an integrated course it companies came here above of students got internships in my course many companies and schools came for cultural events msc mathematics is a year integrated course and msc programme is offered in the branches of mathematics statistics and computer science the freedom is super clean and calm to stay with all the facilities available the food is superb in the freedom and canteen medical facilities are available all the are sports to play all the teachers are friendly knowledgeable and have good communication skills in both english tamil hindi etc the teaching quality is good they make the students industry ready exams are a bit tough but easy to score a good percentage facilities a beautiful campus with healthy academic the university doesnt offer direct cultural events but there is an ocean of opportunities there what i mean is that faculty are efficient in guiding for proper destiny the schools of sciences management and mathematics are conducting direct campus recruitments in case of infrastructure pondicherry university is excellent the university has sufficient classrooms having high power back up high speed wifi the labs are well equipped the central library is awesome and every school will have their own library separate computer labs and seminar halls for each school are available the university has a health centre and in case of the university has a physical education department and is having a good cricket stadium and an extra stadium for the maximum utilisation in case of faculty each department is holding a high profile resume but most of the faculty are merely concentrating on research and pg programmes so most of the integrated programmes are handled by guest faculty only most of the faculty have a doctoral degree and they are well reputed also the curriculum is based on cbcs regulations ie credit system sports review of pondicherry university i dont know about students who got placed we dont have any cultural events in companies it is a central university so the certificate was more valuable and helped us to get job easily we have some national seminars which help us to gain more the infrastructure of our college is very good mess food was somewhat average and we have hours of medical facilities and and games there were many games to play and there were separate grounds also many games were also conducted in which other college students can also participate all the teachers here are seniors staff members so the

teaching quality was very good this course curriculum is relevant and one of our seniors was in asi who was helping and guiding many students to get a job easily many information was given during class hours sports i am satisfied with the university most of our seniors have been placed in reputed companies mainly in the software field apart from that there is also an exchange programme in which students with good grades can join to have exposure and experience in france this college is one of the best in south india for this course facilities are good and everything is maintained very well the infrastructure of our college is quite good and our department is very well maintained there are few ground and medical facilities on the campus it also has a very good library teachers here have much knowledge and there is a lot of things to learn from them subjectwise teaching quality is great the course curriculum is highly relevant and it makes students industry ready for sure professors guide students on the right path sports absolutely satisfied with the infrastructure and facilities of students got placed in our campus the highest package offered was the average is and the lowest is top recruiting companies are tcs cts amazon and datamark the exact students got internship from the companies they got selected the university is known for its infrastructure we have all facilities and infrastructure sports for our course like wifi labs classrooms and library the quality of food in the freedom and mess are great we have a health care centre inside our campus our university encourages the students to participate in various we have the excellent teaching faculty members the teachers are highly knowledgeable and well qualified the course curriculum is more relevant as were in the french translation field the curriculum helps us with various types of translations and makes us ready to enter the technology field activities i am satisfied with the university infrastructure freedom library etc we are developing biotechnologists who are well nurtured by our department both in terms of academics discipline etc currently from our department nearly students are pursuing msc and many are pursuing a phd in their field of interest our department is training us as future scientists the highest salary package offered is nearly sports the minimum salary package offered is sports our seniors did their internship in well renowned government research institutes the college provides facilities like air conditioned classrooms wifi well equipped labs with the latest instruments like nanodrop electron microscope etc there is all necessary equipment which is required for research work the library is sports with all sorts of books to help in our academics and to gain knowledge other than academics journals research publications etc freedom facilities are good and the food served in the freedom is also good stadiums for are available and a health care centre also sports for students professors in our college are well qualified and knowledgeable to nurture us their teaching quality is good with powerpoint presentations the course curriculum is relevant professors fruitfully guide us to pursue our research career and to do good science for the welfare of society sports a good place to learn and explore in many aspects there is no cultural events for the past batches but they have initiated the process from our batch which is yet to happen the highest package is around rs sports of the students have done an internship in isro bsnl and many more companies in fact after internship some students have got placed in those companies the wifi library classroom facilities are really good and the quality is also adorable the food in the mess and canteen are quite good we have a very big play ground for any kind of in case of emergency there is phc inside our campus as well as there is a nearby hospital in km the faculty members are highly qualified and they are well experienced in many ways the course curriculum is relevant and of course it makes the students industry ready the new curriculum makes the students to involve more in competitive exams and also helps to gain more practical knowledge sports it is one of the best university in india because of its infrastructure and teaching quality maximum students from mcom business finance accounting and taxation were selected for jobs through campus cultural events the salary offered was rs per month which is based on the city where they are going for the job as per fresher if it is a metropolitan city then the offer was different job profiles like an accountant tax consultant junior marketing officer auditing officer etc were offered around of students got placed and they are well settled it is central university and its infrastructure is far better than other institutions facilities like hours wifi facility with full speed internet labs are good all computers are updated with the latest version all classrooms are equipped with projectors air conditioners black and whiteboard the library has thousand of course books for various department students and even other books available the library timing is am to pm and the reading room is open till o clock the college provides free medical check

kup and free medical facilities for the university gives much importance almost every type of playground is sportshere the food served is quite different however there is a variety of food along with lunch and dinner the canteen also serves breakfast and evening snack overall the food quantity and quality is good freedom room facilities are good facilities like electricity switchboard water connection wifi facility bed table chair cupboard fans etc are available i did not face any issues regarding the infrastructure of the college teachers in the college are very helpful for academic as well as other consultation they are well qualified and everyone has a doctorate degree the quality of teaching is different from other institutions they used various software like spss r language excel etc to teach us they used a projector ppts ms excel ms word for teaching the student to faculty ratio is 1 had been to industry the course curriculum is based on icai institute of chartered accountants of india and net national eligibility tests sports the college has good facilities and infrastructure there are no cultural events for anthropology but anyone can study this subject if they have passion anthropology is a very interesting subject and provides opportunities in every field the major scope for this subject lies in the research field facilities sports at pondicherry university are very good every school has its own computer labs and a common lab is present in the library classrooms are good and properly cleaned by the staff every day a health centre is run inside the university with a quick ambulance facility which is very helpful for everyone wifi facility is sports hours inside the campus there are different playgrounds for and games and everyone can use them good quality labs are sports in different departments which run for hours freedom rooms are very good wash rooms and common places are cleaned by the staff every day except sunday good quality food is sports in the canteen at low prices i didnt face any infrastructure related problems at pondicherry university faculty members are helpful to some extent they are qualified and very knowledgeable teaching quality is very good normal teaching methods including field studies are adopted by the teachers to improve the teaching quality but it is not so in every department the student faculty ratio is well managed by the administration anthropology students are not provided with any industry exposure but the students of management and science departments can get it the course curriculum is very helpful for competitive exams as well sports really satisfied with the staff and college management cultural events in this college are very good and many companies are visiting our campus for cultural events students are also getting placed in good companies with a nice salary package they are conducting cultural events classes for every year with well trained faculty members the infrastructure of the college is good well furnished classrooms labs canteen and mess are sportshere we have air conditioned labs with high speed internet facility pcs work well here and the labs are enabled with tiles flooring they keep the campus very clean and the playground sportshere is very big for playing the college appoints well established trained people as faculty members our staff members are student friendly and they have good verbal and nonverbal communication skills they teach all the concepts in the syllabus and they also conduct regular tests and examinations sports satisfied because of the friendly environment good infrastructure and faculty the cultural events record is good some of the students are being placed at various research and development biomedical companies such as ranbaxy dr reddy lab etc as research associates they are getting salary around rs per month most of them are placed at various csir labs and few are going to abroad for doing phd and getting a respected fellowship the students also got chance of doing the internship at various research labs across india such as indian academy of sciences iits iiser ccmb even some of them have completed internship project from cold spring harbor lab usa respective institutions offered the project stipend and that is around rs per month along with the travel allowance university department consists of well equipped labs along with various sophisticated instruments and central wifi system air conditioned seminar rooms with audio quality it has a health centre inside the campus providing a good medicinal facility for the students faculty and workers university is having a well equipped along with one football one cricket stadium one basketball tennis badminton stadium the university is situated in the southern part of the country so the mess foods are mainly south indian type north indian dishes are sports at canteens there are canteens situated on campus along with different messes for boys and girls the faculty are well and helpful they use different power point slide based study system along with blackboard system departments have many faculty members along with professors associate professors and assistant professors we have to visit one or two industries and has labs for our projects in every se

mester we have to do some field work and learn some practical industrial work the course curriculum is not full but most of it is important for csirnet or any other phd exams such as gate dbtnet etc facility it is an excellent institution for learning along with exposure to higher studies only two companies visited the campus to offer cultural events to our batch and six companies visited the campus for cultural events of our senior batch most of the students are pursuing phd from premier institutions of india srf and api global are the two companies visited our campus students from poor background get fellowships from the university the research scholars are also given fellowships the whole campus is wifi enabled facilities like labs classrooms and library are excellent medical facilities are sports hours school of physical education offers various like football cricket etc for interested students there are three good canteens on the campus freedom rooms are very good and the food served in the freedom is also good all the teachers in our college are excellent they are highly qualified and quite friendly they help us in higher studies and difficulties they are quite cooperative the quality of teaching is excellent various softcore and other courses which are provided to the students help them to be active in all areas sports i like the campus and the events that happen here the college conducts semesters every year two semesters and in three years you will get a degree you will go a semester lot of companies will come like zoho tcs wipro infosys e care india pvt limited this company had entry level exam if you pass the entry level exam then you go to interview if you successfully interview one week later a call letter comes the room is simple we have beds and cupboards we have to buy mattresses on our own and we have water issues because of the lack of automatic motors the mess food is not hygienic sometimes and the menu is quite boring also the fees are paid online from sam portals after taking admission freedom fee inr per year the syllabus is very light for applied mathematics at this university there are only semesters that have written exams the last semester is just a project and viva one factor i liked about the curriculum is that in the third semester we can choose our specialty based on our interests there are options counseling clinical and industrial psychology events love pondicherry university pondicherry zero percentage of students are placed in our course no campus cultural events are there for our course no recruiting companies will come just we have to improve our skills that's it many students are doing internships regarding projects but the college is not providing any internships we the students are only searching the facilities and infrastructure sports for my course department eg wifi labs classrooms and library are really very good we are very glad that we have high level infrastructure and the quality of the facilities in my freedom is also very good the food sports in the canteen medical facilities and games are also very helpful the teachers are very helpful they are very friendly in nature and they also have lots of knowledge to share with us they are highly talented people and their teaching quality is extremely good yes this course curriculum is relevant it makes us industry ready it is not that difficult to pass sem exams if we are well prepared sports good campus and nice facilities the college has great cultural events and job opportunities in the final year the highest average package is lacs per annum and the lowest average package is around lacs per annum top recruiting companies include biocon biobase etc the top roles offered are in bioinformatics bioinformatics scientist and related fields the college provides good facilities like free wifi and freedom accommodations mess food is decent classrooms and labs are sufficient and there are multiple grounds the library is useful for students and the infrastructure is well maintained with proper buildings classrooms and workshop the teachers are well qualified with higher degrees in their respective subjects they are helpful friendly and provide quality teaching the course curriculum is relevant but the semester exams are difficult with a pass percentage above sports one of the best college campuses available more than percent of students were placed in our college and over percent of students secured internships on campus the highest salary package offered is lakhs per annum while the lowest package is lakhs per annum many mncs including ibm visit for recruitment the infrastructure and facilities sports at our college are excellent they provide wifi labs and a library additionally there are well equipped departments and classrooms the food quality in the college freedom is acceptable and the mess is very hygienic and other events are conducted every semester the teachers are very helpful and possess good qualifications and knowledge in their subjects the teaching quality is good which helps us understand the course material our course curriculum is relevant and prepares us for the industry however the exams are quite challenging with a passing percentage of percent sports better infrastructure is available pe

localhost:8892/nbconvert/html/Main project file.ipynb?download=false

nt cgpa must be greater than and minimum backlogs are allowed many events and occasions take place in university starting from onam to pongal to ugadi and christmas onam usually happens in september and pongal in february and christmas in december the library also has a very good range and accessibility of books smart boards are also sports in classrooms and even air conditioner is installed in classrooms and university organizes various various social groups like sfi nsui msf abvp students led organizations are present in the campus faculty to student relationship is very good with maximum of faculty and way of teaching is decent clarification of doubts are always good and encouragement among your skill according to me it faculties are good and exam structure is that there are semester per year and each semester consist of mids internals and a external competitions the course is very easy to focus on research there is only one internship provided in the final year of the college which lasts for months and we have to prepare a journal on the given topic there will be an internal viva exam where professors from different colleges gather to conduct the question and answer process only final year students are eligible for cultural events and the companies offering cultural events through our college include infosys tcs accenture piramal finance ai and many more ninety nine percent of the students get placed in these companies extracurricular activities like are conducted by the management once a year there is no discrimination based on sexual orientation politics or economic status in our college and there is no ragging workshops are conducted yearly in our college we have a technical event called science fest and we also have a cultural event called cetafest our management conducts festival events on festival days and in technical events there are more participants from other colleges as well the faculty is sufficient in number to engage classes without any interruption the faculty i have liked the most is our principal mr patil who is a big encouragement for the students he meets all the needs of both students and faculty the faculty i dislike is our teacher mr patil he has a tendency to compare students and only focuses on his profit from our results and doesn't support us in anything even though i have made achievements in my sports great campus life great memories cultural events are great each and every student is guaranteed a cultural events with a minimum salary if you are prepared well you can get cultural events in multinational companies even many students got selected in various posts of the uni too there are selections for extracurricular activities too the university infrastructure features modern classrooms well equipped labs libraries with extensive resources green space advanced and efficient transport it supports research and learning though areas like wifi and maintenance need improvement the curriculum balances theory and practical with a focus on industry relevance exams are fair but could encourage critical thinking over rote learning faculty is knowledgeable and supportive though the teacher student ratio and regular training could improve facilities christ college of engineering and technology in btech mechanical engineering admission information in this college for cultural events facilities this college is not very good because there is only student cultural events provided in this college many companies intern at the college like tcs accenture wipro etc these types of companies intern at the college and provide salaries ranging from lacs to lacs in this college the best facilities are provided like the best wifi connection neat and clean classrooms bathrooms gardens labs canteens etc the facilities are available the college canteen food is very tasty and healthy because it is provided like homecooked food this college committee is organizing and games tournaments in this college the teacher is very helpful and very knowledgeable for the students in this college the teachers are very intelligent and phd scholars are available this course is a 4 to year course duration and semester exams depend on the delhi ncr university sports affordable well equipped campus with good cultural events around of computer science students at pondicherry university secure cultural events with high salary packages ranging from sports to sports top recruiters include infosys wipro etc about of students get internships at companies like zoho hexaware common roles in data analyst and system engineer pondicherry university computer science department has well equipped labs wifi and a library freedoms have shared rooms dining halls and recreation areas the mess food is decent and include volleyball cricket basketball and indoor games a health center provides medical care pondicherry university msc computer science faculty members are qualified and knowledgeable the industry relevant curriculum covers ai cybersecurity and hci exams are moderately tough but manageable with preparation the pass percentage is above this comprehensive approach aims to equip students with the necessary skills for both industry and research facilities i am satisfied because of the good environment for studying faculty

ty infrastructure and facilities more than offers were made the previous year the highest salary package offered was sports and the average salary package offered was sports many top companies including dell infosys and others arrived on our campus companies such as jaypee groups hcc tata larsen and toubro unitech and others participated in our course there is wifi as well as good classrooms and a library are available the facilities are of good quality the mess food is good and they provide chicken twice a week a large playground is sports for and games there is no signal inside the freedoms and classes too only bsnl works very well wifi will be sports teachers in our college are qualified and knowledgeable they teach properly they explain it in a good manner the courses offered here are good and relevant for industrialists exam preparation makes it not too difficult the pass percentage is more than sports it is a good college for middle class students many super specialty hospitals recruit students of our course our college provides on campus cultural events there are days of classes and days of hospital practicals it is very easy to learn radiology many foreign opportunities with more salary packages are provided in our college all the bvoc optometry students got placed in the previous year at lenskart our seniors got jobs on campus freedom facility is not sports in our college but it was sports before corona many private freedoms and rented rooms are sports near our college at low fees government freedom is available food served is average wifi facility is sports in all the labs library is very good in our college all types of are sports and coaching is given for games our college has a canteen that serves all the delicious food items at a low cost all the professors in our college are well talented experienced friendly and strict they teach easy methods for students to easily understand semester exams are conducted for marks for theory and consider of them practical marks are different from theory attendance is given importance in our college students are not allowed to write exams if they have less than of attendances sports well satisfied with the college faculty cultural events good facilities of students are placed in my course the highest package offered is sports the top recruiter for my course were qualcomm dell infosys amazon zoho verizon accenture etc of students got internship from my course in infosys tcs etc our department has a high speed wifi internet facility well organized laboratories environment friendly classrooms with a projector for visual teaching and a department library which has all books necessary for instrumentation engineering students the freedoms are well maintained our college even has a canteen and conduct regular and games the teachers were helpful for the students by providing necessary study materials teachers were well qualified in their core subject and well knowledgeable the course curriculum was very relevant to the department the semester exams are easy as well as difficult in some cases sports'

Out[11]: 'known for its bad management working culture with incompetent faculty enjoying incentives and boot lickers of the top management ruining students career bureaucratic delay hostel be the key player you hostel find in every table of the administration poor placement and no rapport with the industry people with the highest paid ctc for a mba graduate is inr lakhs which is lower than an engineering student getting from this campus the bottom line is never choose this institution though it is a central university there hostel be no scope or hope for your career advancements around percent of people get hostel in cse averages and negligible in other branches the average package stands at 1 and the highest package is 1 very less worst get internships companies like it wipro tcs etc mostly call center roles are bad still in developing stage bad placements bad infrastructure and facilities the infrastructure in this placement is still in the developing stage classrooms are not equipped with digital equipment or any wifi requirements the library is very outdated labs are very old and equipped with very old equipment the hostel is also very basic which is frequently disrupted by water and wifi all the teachers here are phd holders teaching quality is not bad the curriculum is still old curriculum semester exams are very easy a one night study can get you a pass the pass percentage is percent the attendance percentage requirement is percent very few worst get hostel though the cell the university seems to be more interested in selling placement services than actually getting worst hostel and the packages bad to worst are very low in my average there was no placement at all pondicherry university with only vibe the new block for the department of management studies is already built but the worst are still in the old sj building the wifi connection is too poor and the classrooms are not wide enough the library is not open hours and the hostels and mess food are not bad the medical facility is also very poor the syllabus and average structure are outdated a student with the right caliber can teach themselves the material the entire syllabus is a rehash of what we studied in the past years there is nothing new the semester exams are not difficult they're too easy for someone who knows the subject the teachers dislike it when we question them only a few worst are hostel this year the highest salary package bad is lpa the lowest is lpa and the average is lpa top recruiting companies are zoho tcs and karrou placement does not organise any cultural events there is no wifi on campus wifi is available only in labs there are average classrooms and below average labs the quality of food available in the mess is not bad but it is average in the canteen the library is bad there is a separate id card for the library at our placement teachers are helpful qualified and knowledgeable the quality of teaching is above average semester exams at this placement are difficult the pass percentage in information technology is the average curriculum is relevant there are no placements in our mess food no companies come here there are no internships either the campus is small like a school i do not recommend this mess food the infrastructure is very bad and the campus is small the library is okay but there is no internet access or pcs for us the classrooms are average and the campus is very small like a nursery school even the mess food didn't have canteen facilities which is very bad everything here is average i don't recommend this mess food only around of the worst were hostel the highest salary bad 1 per annum the lowest 1 per annum was bad tcs zoho wipro are the top recruiters get roles only as trainees not as employees were bad the highest 1 per annum the lowest per annum was bad to our average just a handful got internship and the companies are local companies satisfied feeling of the placement totally no wifi facility labs classrooms library are fine labs were bad equipped but weren't let to utilize fully hostel is not bad canteen mess all are horrible medical facilities haha they won't let us use them sports and games weren't allowed to play teachers were not fully knowledgeable they did what the syllabus had teaching quality is not bad but the teachers were double faced not at all only book contents are taught worst were not given any exposure a typical syllabus based faculty student relationship no worst got hostel from the placement because none of the companies visited our placement worst got hostel off campus in companies like tcs and infosys with a salary package of lpa the role bad to them was as a system engineer specialist out of worst only one student got an internship from the placement and there were no placements provided by the placement it is a bad placement if you want to do some research or self study wifi is too slow in our placement books provided in the library are very old lab computers are outdated only windows operating system is available in every computer the food served in the hostel is very bad only south indian foods are preferred there is no canteen available on the campus some teachers in our placement are helpful only a few teachers are qualified with a phd whereas others are qualified

ed with mtech only the curriculum is not relevant and this average hostel not make worst industryready department is not trying to take any initiatives to upgrade average and to call companies for placement around of the worst get hostel from our placement the highest salary package bad was around lpa the lowest salary package bad was lpa top recruiting companies were cts hcl integral sutherland and tech mahindra the role bad was of technical support the highest salary bad in our average was lpa and the lowest salary package bad was rs per year an average salary bad was of lpa internships are not applicable here i am not satisfied with the placement to study engineering there is a lab with old computers a library with no study period in the schedule the placement has classrooms but with uncomfortable chairs there is no wifi connection bus facility of the placement is the worst canteen food is so bad the hostel food served has insects there are no sports facilities available to play the placement doesn't provide any medical facilities the canteen serves bad quality food the teachers of our placement are not helpful they are neither qualified nor knowledgeable except a few few teachers come to the class read the books and leave there is a bad teaching environment in the placement the teaching quality is very bad the average curriculum is relevant but worst must learn by themselves no teacher is helping the worst except a few most of the companies that came for placements were startups bpos etc there were no core companies for placements some of the software companies that came were road i don't think anybody from our mess food got internships there is a placement cell in the mess food and it was not that efficient dissatisfied because of the department rules they treated us like school children about the facilities there is no wifi facility on the campus and you are not allowed to bring your cellphones there are many labs but some of the computers in the computer lab were not working there were only limited components in the ece lab our mess food provides road medical facilities and does not promote sports and games in fact sports day was conducted only once during our four years about the infrastructure some of the buildings were road the library has centralized ac and it has great collection of books the food was okay most of the teachers were really helpful during the semester exams some of them have road knowledge and teaching methods some faculty members were not road enough because they were not experienced enough i didn't get any industrial exposure i think no one got industry exposure there are no placements at present because there are very few worst in the placement the placement is going to be closed so the percentage of the placements decreased gradually year by year previously a lot of companies are recruiting worst from this placement absolutely dissatisfied because of faculty the infrastructure is very bad there is a large area with many department blocks playground and library each block has its own auditorium there is a lot of space in the placement we hostel get great atmosphere there is separate hostel for both boys and girls and also there is separate hostel for juniors four averages are available in the placement those averages are mechanical electrical and electronic electronic and communication and computer science engineering even though there are bad groups but there is no proper faculty to handle worst and guide them there are placements in the past years but there are no placements right now the mess food is going to shut down in the next academic year and the students who have not cleared subjects have to choose the better alternative the hostel and mess food canteen also got closed the review of regency institute of technology the infrastructure was road but everything went down due to mess food close all the things were not working properly because of lack of maintenance the proper guidance all got down including systems incorporated in the next few days get closed permanently because of this i had completed my graduation in electronics and communication engineering from this mess food the faculty members are damn road and helpful for us our mess food is under the affiliation of pondicherry university in pondicherry and it is a central university recognition i don't know about the placements because the bba average in my placement is just three years old and this year the final year worst hostel pass out and then we hostel get to see whether they hostel get placements or not but i don't think it hostel make any bad future because after all it is a distance mode placement what they hide from all the worst very expensive and distance mode the placement is not bad and too expensive they are now charging nearly about one lakh fifty thousand for the average and i think this is valueless to spend this huge amount on a distance mode placement it is a very little placement even you won't get many books in the library otherwise it is okay the faculty are very bad no doubt all the faculty members are well trained and they utilise all their knowledge and wisdom to teach us they are very helpful every time they are always ready to clear all our doubts they are polite

to us all the time not that much company are approaching our placement only small are coming and if some big company comes they take only one or two that's all placement more no of companies should come to our placement for the campus recruitment they have to help us for the future job of our life literally most dissatisfied i think to discontinue the worst infrastructure ever you can see in a placement the classes have every slow running of fans and no ac labs and even we can say we have no lab at all no proper internet connections not as fast as the worst ever the computers are very old and we have only space for lab only space no computers at all the placement has bad faculty members but some are so partial enough some work hard for worst some gives questions and read that only they are only university exam minded and only for the semester no extra knowledge we can gain in our class the only questions that to write our exams in our mess food they mainly focus on tcs all one other than that company they don't give much importance the highest pay offered is lpa other than that they arrange only bpos in pondicherry this mess food is road from the parents point of view the area of the lab is a small room for wifi we have to get the password from the administrator classrooms also they change often there is no separate ground to play the outdoor games the hostels are very bad there is drinking water available on every floor but sometimes there is no water the purifier is also not cleaned properly their teaching is like a tuition center and they put night studies they will make partiality for boys and girls the faculty is also is less there is no industry exposure the staff is also outdated they pressure the staff for only marks they put the lab marks as they wish they will not allow us to attend the exam for small reasons it's a developing mess food needs to improve more the principal is very road but the chairman isn't so we can't expect more benefits when i first saw this mess food infrastructure i was astounded but later i discovered it's not our mess food alone the campus is for a group of mess food in same location there hostel be placements but i did not attend the placement training but they have put my pic has hostel in a random company to show there is like placement fake placements this is a very the worst placement but they hostel show them as they are the best in pondicherry better to study in government placements instead of this sht you can just get a degree infrastructure is there but the staffs are not bad they hostel give priority to some worst and hostel be very arrogant for me there are like staffs in that six four of them are arrogant and two of them can't even teach properly hostel is also average i am not hosteller but i have visited and ate food there the teachers are not helpful only like one in five staffs are qualified and knowledgeable this average did not make worst industry ready most of them got hostel in it companies the exams are not that difficult you have to prepare everything by yourself the staff hostel not help you and if you raise any queries to head of the department they hostel take tier revenge by lowering your internal marks and also lowering your subject marks the same thing happened to me even i studied hard and wrote correct answers to each and every questions i hostel get like d grade there are no campus drives you can go for off campus placements and do not wait for the management to arrange campus placements career development averages are conducted but they are not worth the money and time spent you can go out and learn a new skill and develop it review of achariya arts and science placement wifi facilities are not available and mobile phones are banned inside the campus sports and games are quite bad they are appointing the passed out worst as teachers they are not experienced since the placement is affiliated with pondicherry university you can study by yourself but teachers hostel give internal marks only to worst who are friends with them there is no proper placement in this placement only small companies come to this placement and the package hostel be to lacs per annum absolutely very dissatisfied because of bad infrastructure no placements there is only boys hostel in this placement and that is far from placement and it is in small village there are no facility in that hostel and the placement infrastructure is very bad the worst one i had ever seen the movie was the only one of our games are on a regular basis faculty is very bad they can't even speak bad english they only teach in tamil they are not eligible for this job our mess food doesn't provide placements none of the companies visits this mess food and you have to search for jobs on your own from our senior batch only one student got placed in cognizant the highest salary offered for that student is rs per month from our batch even a single company haven't visited to conduct interviews it is the worst mess food and i suggest you to think twice before joining in this mess food the infrastructure of our mess food is not that bad and there are no opportunities to improve your skills our mess food is in unhygienic conditions and hostel rooms are the worst library facilities are somewh

at road and we can get books which we want sports are conducted only once in a year and there were medical facilities on this campus some faculty members here were road and had enough knowledge to share but some don't know anything and they just come to classes for time pass if you join in this mess food you have to prepare on our own the faculty to student ratio is you don't get complete knowledge here pondicherry university karikkal campus insurance management review there were placements for my batch as well as my senior batch nearly companies attended the placement programme the highest package offered was lpa and the lowest was lpa with average being lpa iffco tokio gic bajaj allianz gic aon global brokers etc management trainee executive sales manager got internship no stipend was offered during internship to my knowledge yes there is a placement cell not very useful every placement related activity ranging from calling hrs to arranging everything is upon the students classrooms are good with no wifi library and basic medical facilities are there no big ground for sports only outdoor games available were cricket volleyball only computer lab with poor net connection very poor quality food in canteen hostel rooms are congested with full of mosquitoes unhygienic conditions yes when i was there we faced infrastructure problems as the classroom had bad board and less usage of projector not good experience at all few teachers were not having any insurance background didn't even complete licenciante exam from iii teaching quality was not upto the mark as none of them had any prior experience in insurance studies classroom teaching and viva presentations were the teaching methods faculty student ratio yes i worked for iffco tokio as a part of my internship course curriculum was prepared by the same professors who taught us as they didn't have any insurance exposure curriculum was not upto the expected mark the college must improve a lot there are no placements in my college few industries conduct walk-in interviews there are no placements no package is offered and no internships are offered the course helps us to get an overall general view of all sectors so it is easy for us to attend competitive exams there is a library on our campus and it is useful classrooms are a bit old renovation is going on in our hostel the quality of the food in the mess is poor the management is working on it we have good sports facilities we have many clubs for different activities the teachers are well qualified experienced and knowledgeable the course has too much information which can be reduced it makes the students stressed semester exams in our college are quite difficult most of the students pass except a few the percentage may be around 60 its not worth studying there in yanam degree college zero placements are there as placement cell isn't functioning the college had so many science courses in ug and pg but in terms of placements its very bad they don't make us think about career during our study i personally think the other department faculty is not very well qualified i studied chemistry there in the college and the department had age old staff with less interaction with students in terms of contemporary ideas they mismatched me fully in the years of journey in the college language dept and zoology department acts for the destruction of name of the college the course curriculum isn't relevant to the study my batch didn't enjoy the course due to high pressure from the faculty member the college is not doing any collaboration no placements low wifi speed and instruments tools and machinery must improve there are no placements available here no internship opportunities are provided here the roles offered for bsc agriculture are afo at banks field office sales managers fertiliser shop managers and all poultry and dairy related jobs so graduates can start their business in an agriculture related field as entrepreneurs they have decent lab facilities a classroom and a library the mess food does not have a road mobile signal area so it is difficult for students to communicate and the wifi facilities are there for only staff students have only wifi common areas in the entire campus they provide only limited speed and it is not located everywhere the teachers are helpful qualified highly educated and knowledgeable the exams are a bit difficult for some particular courses the students may fail over of students fail in specific courses and they struggle in every semester or courses may be challenging for slow learning students and average learners poor infrastructure and facilities poor crowd bad canteen no future scope from here getting hostel in placement is not even a big deal anyone can get hostel if you just pay the fees top recruitment is mostly from chennai and also done internships are also given but its not provided with bad money it would be bad if you further do any pg from somewhere else the placement has a library but they never allow it it has a small canteen that's bad the ground is there but its always locked no ac smelly toilets it has no wifi very decent classrooms and bus facilities are available for worst who are hosting to take the placement bus teachers are bad but they don't teach what's relevant

and exams are so easy everyone passes so they dont make us ready for the future the pass percentage is only it includes a mixture of internals and written exams but honestly no scope of you are fully indulged in for studies compared to other central universities you have high fee the internship rate till last year was but this time some placement drives are happening not only for political science but for social science in general the salary is around rs to per month the syllabus is purely similar to du department facilities are comparatively student friendly there is a new building for the department but it have a lack of furniture and the wifi speed is poor the mess food is also comparatively bad there is no lab for political science the computer lab is not efficiently working and the reading room in the sj campus is only working till pm few teachers are highly qualified and very good in academics recent years faculty student ratio is very less syllabus is similar to du but due to introduction of nep there is some issues regarding syllabus and course structure the introduction of nep case very stress on students you can have memories and friends but they dont offer proper placements many of them and cse worst got hostel in our batch the highest package is lpa and the lowest is lpa our batch placement offers in not bad in developing the students skills before the placement offers so it is difficult for many of the worst to be hostel mostly mechanical and civil worst there are no proper classrooms for both worst and staff the hostel is in the worst condition there is no quality food and water the building is too old the library is a bad place to read and spend some useful time in our placement the canteen is so bad and for six months once we used to conduct sports event without fail faculty members are the worst but few staff members are there for the improvement of the worst careers like elayarani mam and sathyamurthy sir the pass percentage is out of in this internal marks are so we can easily score higher in the semester examination without any arrears insights on course structure and faculty in computer science nearly most of the students were placed in my batch and its still going on up to date the highest salary was offered by content sack a figure of lpa there are further more companies offering a minimum of lpa the company named zoho took an intern from our batch and other companies like hexaware and multicore also provided internships coming to infrastructure i would say that its below average they provide wifi within the circumstances and its not good either the classrooms are good coming to labs its very well equipped with updated systems and the library is provided with more than books of different genres the faculty was quite short it led to difficulties in the semester and providing quality education not all of them are good there are some staff who take good care of your time the curriculum is very strict to the course perspective and they take advantage of every program conducted through the respective departments the mess food provides road infrastructure with libraries for better knowledge the highest package is about lpa and the lowest package is about lpa the top companies involves the tcs zoho and also includes many other top recruiting companies the roles can be a cybersecurity web developer web designer hacker data analyst data scientist etcadequate infrastructure is available a canteen with both vegetarian and non vegetarian food is also provide by mess food campus separate hostel facilities are provide for both girls and boys in the mess food campus there is no such thing as automatic food delivery the mess food has a teaching facility with some experienced teachers the teaching aids used by staffs are modern the curriculum is relevant and the semester exams are a bit difficult to get but can be overcome by continuous monitoring of the subjects and their relevant with real world i am not satisfied with this mess food because of the lack of programs there are around of students in computer science and engineering cse course helps to find work in it related companies around the world the mess food tuition fee is around rs per annum top recruiting companies include ibm byjus and other top companies our mess food doesnt have wifi and classrooms the canteen is shutdown for some reason there are labs for our department of which the computer lab is road with wifi and air conditioning facilities the other labs arent much road there is no importance for sports in this mess food which is disappointing teachers in this mess food are highly qualified but they teach us in their mother tongue that is tamil language which is not a professional way of communication in an engineering mess food students not from kerala find it difficult to understand tamil and thereby not understanding the classes the infrastructure of our placement is comparatively bad percent worst were hostel in our placement the highest package in our placement is lacs per annum the lowest package is lacs per annum and the average package is lacs per annum most of the cse worst get hostel the infrastructure of our placement is comparatively bad and facilities are okay the quality of the facilities in o
